## European Unity on the Rocks

Greeks and Germans at Polar Opposites

In Europe, what started out four years ago as a sovereign debt crisis, morphed into a euro currency crisis and led to the fall of several European governments, has now triggered a full-blown crisis of public confidence: in the economy, in the future, in the benefits of European economic integration, in membership in the European Union, in the euro and in the free market system. The public is very worried about joblessness, inflation and public debt, and those fears are fueling much of this uncertainty and negativity.

Europeans largely oppose further fiscal austerity to deal with the crisis. They are divided on bailing out indebted nations. They oppose Brussels’ impending oversight of national budgets. At the same time, Europeans who now use the euro have no desire to abandon it and return to their former currency. And anti-German sentiment is largely contained to Greece, at least for the moment.

The crisis has exposed sharp differences between some Europeans. Germany is the most admired nation in the EU and its leader the most respected. The Germans are judged to be Europe’s most hardworking people. And the Germans are the strongest supporters of both European economic integration and the European Union.

### Mixed Views of European Unity

PEW RESEARCH CENTER Q8f, Q8o, Q35 & Q95.

Greece is the polar opposite. None of its fellow EU members surveyed see it in a positive light. In turn, Greeks are among the most disparaging of European economic integration and the harshest critics of the European Union. And they see themselves as Europe’s most hardworking people.

These are among the key findings from a new survey by the Pew Research Center's Global Attitudes Project, conducted in eight EU nations and the United States among 9,108 respondents from March 17 to April 16.

### European Unity in Trouble

The European project, which began with the creation of a small Common Market in 1957, grew to a larger Single Market in 1992 and then created a single currency in 2002, is a major casualty of the ongoing European sovereign debt crisis.

Across the eight European Union member countries surveyed, a median of only 34% think that European economic integration has strengthened their country's economy. Indeed, majorities or near majorities in most nations now believe that the economic integration of Europe has actually weakened their economies. This is the opinion in Greece (70%), France (63%), Britain (61%), Italy (61%), the Czech Republic (59%) and Spain (50%). Only in Germany (59%) do most people say that their country has been well served by European integration.

Among the five euro area nations surveyed, a median of only 37% believes having the euro as their currency has been a good thing. This includes just 30% of the Italians and 31% of the French. At the same time, the three non-euro zone countries surveyed are quite happy they have kept their own currencies, including nearly three-quarters of the British (73%).

<b>Stereotyping in Europe</b>				
<b>Who Works Hardest, Who's Corrupt</b>

Poland	Germany	Greece	Poland	Germany
Czech Rep.	Germany	Greece	Czech Rep.	Germany

PEW RESEARCH CENTER Q50aCOMBO, Q50bCOMBO, Q51aCOMBO, Q51bCOMBO.

A median of about four-in-ten Europeans (39%) surveyed think favorably of the European Central Bank, the institution at the center of the debate over how to deal with the euro crisis. That includes just 15% of the Greeks, 25% of the Spanish and only 40% of the Germans.

Moreover, as public criticism of European unity grows, faith in its benefits and institutions erodes. Since 2009, belief that European economic integration, the *raison d'être* of the European Union, has weakened their national economy has grown by 22 percentage points in the Czech Republic, 20 points in Italy, and 18 points in Spain. And, since 2007, the favorability of the European Union as an organization has fallen 20 points in Spain and the Czech Republic, 19 points in Italy and 14 points in Poland.

Among the Europeans surveyed, only in Germany is there a growing majority that believes that integration has been an economic boon for the nation and a strong majority that says EU membership has been good. And only in Poland, a non-euro zone country that is also not a member of the European Central Bank, does more than half have a favorable opinion of that institution.

Nevertheless, the symbols of a united Europe retain public support. Despite the falloff in EU favorability, most Europeans surveyed still see the European Union in a positive light, including 69% of the Poles, 68% of the Germans and 60% of the French and Spanish. And more than half in all five euro area countries surveyed – including 71% of the Greeks, 69% of the French and 66% of the Germans – would like to keep the euro as their currency and not return to the drachma, the franc, the mark or other national currencies.

### Support for Free Market Declining

	% Completely/mostly agree				
	2007	2010	2012	07-12 Change	10-12 Change
	%	%	%		
Britain	72	64	61	-11	-3
France	56	67	58	+2	-9
Germany	65	73	69	+4	-4
Spain	67	62	47	-20	-15
Italy	73	--	50	-23	--
Greece	--	--	44	--	--
Poland	68	68	53	-15	-15
Czech Rep.	59	--	50	-9	--
U.S.	70	68	67	-3	-1

PEW RESEARCH CENTER Q26.

The euro crisis has also undermined support for free market capitalism. Solid majorities in only three of the eight countries surveyed – Germany 69%, Britain 61%, and France 58% – still believe that people are better off in a free market system. Moreover, since 2007, before the global financial crisis began, belief in capitalism is down 23 percentage points in Italy, 20

points in Spain, 15 points in Poland, 11 points in Britain, and nine points in the Czech Republic. In comparison, over that same time frame backing for the free market has remained relatively unchanged in the United States.

## Deepening Gloom

As might be expected in a time of turmoil, Europeans are profoundly dissatisfied with the direction their countries are taking. This is nothing new. Europeans have been consistently downbeat about the state of their nations for the entire 11 years the Pew Global Attitudes Project has been surveying in Europe. But this year the mood is particularly grim. Miniscule numbers of Greeks (2%),

Spanish (10%) and Italians (11%) say their country is on the right course. And satisfaction is down a whopping 41 percentage points in Spain since 2007, before the crisis began. The Germans, however, see things quite differently. More than half (53%) are satisfied with Germany's trajectory. And such sentiment has brightened by 20 points in the last five years.

Dissatisfaction with their country's direction tracks Europeans' bleak assessment of their national economies. A median of just 16% of Europeans surveyed think their economy is performing well. The Greeks (2%), the Spanish (6%) and the Italians (6%) are particularly despairing. Again the Germans differ – 73% give strong marks to their economy. Europeans' economic assessments have not changed that much since 2011. But there has been a profound negative turn in economic sentiment since 2007. Positive views of the economy have fallen 59 points in Spain and 54 points in Britain in the last five years. Again the Germans are the outliers. They are 10 points happier about the state of their economy than they were in 2007.

This concern about the economy is helping fuel frustration with the creation of a unified Europe. In a number of countries, strong majorities of those who think their economy is in

### National Conditions Grim, Economy Worsening

	National conditions			Economic conditions		
	% Satisfied			% Good		
	2007	2012	Change	2007	2012	Change
	%	%		%	%	
Britain	30	30	0	69	15	-54
France	22	29	+7	30	19	-11
Germany	33	53	+20	63	73	+10
Spain	51	10	-41	65	6	-59

Greece	--	2	--	--	2	--
Poland	18	33	+15	36	29	-7
Czech Rep.	23	14	-9	41	16	-25
U.S.	25	29	+4	50	31	-19

PEW RESEARCH CENTER Q2 & Q14.

bad shape also believe that European integration has been bad for their country, including two-thirds of the French (67%) and the Germans (67%) who are concerned about the economy and nearly that many Czechs (65%) and British (64%). Similarly, among those Germans who think the economy is doing poorly, 54% think that having the euro as their currency has been bad for Germany. A plurality (44%) of the French who are worried about their economy also are critical of the euro.

Europeans are divided over who is to blame for their economic woes. Among those who say their economy is bad, the Greeks (87%), Italians (84%), Poles (90%) and Czechs (91%) complain that their own governments are responsible for current economic distress. The French (74%), and Spanish (78%) fault the banks and other major financial institutions. The British and the Germans blame both. Such sentiments have not changed much in the last year. Notably, Europeans do not blame the United States.

## A Bleak Future

Most Europeans have little hope for their economy's future and do not think their children will have an easy time improving their lot, yet they acknowledge that, for all their current and possible future troubles, today's generation is better off than their parents.

Across the board, Europeans expect the adverse effects of the euro crisis to continue for the immediate future. A median of 22% of those surveyed see the economy improving over the next year. The least optimistic are the

### Despite Economic Pessimism, People Still Feel Better Off Than Their Parents

	Economy will improve in next 12 months %	Very difficult for young person to find better job/get wealthier* %	Standard of living better than your parents at same age %
Britain	32	50	63
France	22	37	48
Germany	29	23	70
Spain	25	69	71
Italy	22	62	57
Greece	9	73	57
Poland	18	44	57
Czech Rep.	13	38	61
<b>MEDIAN</b>	<b>22</b>	<b>47</b>	<b>59</b>
U.S.	52	39	60

\*Question read, "How easy or difficult is it in our country for a young person to get a better job and to become wealthier than his or her parents were – very easy, somewhat easy, somewhat difficult or very difficult?"

PEW RESEARCH CENTER Q4, Q15 & Q64b.

Greeks (9%). The most optimistic are the British, but still only a third (32%) have a positive outlook. By comparison, Americans (52%) are 30 points more upbeat about the trajectory of the economy than are Europeans.

Among the EU nations surveyed, a median of 47% seriously doubt that their children will be able to climb the economic ladder. Such generational pessimism is particularly profound in those societies most hard hit by the euro crisis. Nearly three-quarters (73%) of the Greeks, 69% of the Spanish and 62% of the Italians worry it will be very difficult for young people in their countries to get a better job and to become wealthier than their parents. Notably, Germans are less pessimistic about economic mobility than are Americans.

Despite their glum assessment of current economic conditions and their doubt about economic prospects for their country and their children, Europeans do consider themselves better off than the previous generation. A median of nearly six-in-ten (59%) says their standard of living is superior to that of their parents. This is comparable to Americans' (60%) view. Only in France (48%) does less than a majority see themselves as better off.

## **Pervasive Worry**

Despondent about the economy, pessimistic about their economy's prospects and worried about their children's futures, Europeans see economic threats on all sides. Nearly nine-in-ten Europeans (88%) surveyed say unemployment poses a major threat to their economic well-being. This includes almost all the Spanish (97%) and all the Greeks (97%). Eight-in-ten (81%) think their country's national debt is a threat, including again 97% of Greeks. And three-in-four (74%) Europeans surveyed believe rising prices could undermine their well-being. Inflation is particularly a concern in Greece (93%) and Italy (89%).

Greek and Spanish concern about joblessness is hardly surprising. The Greek unemployment rate was 21.7% in the months prior to the Pew Global survey. And in Spain it was 24.1% the month of the poll. But 70% of Germans are also worried about the lack of jobs even though Germany has a jobless rate of 5.6%, the lowest among the eight European countries surveyed. Similarly, Greek (97%) and Italian (81%) concern about the size of their national debt is in line with the 160.8% debt-to-GDP ratio in Greece and the 120.1% debt-to-GDP ratio in Italy. But 82% of the Czechs are also worried about their public indebtedness even though their debt to GDP ratio is only 41.5%. Most strikingly, 93% of the Greeks are concerned about rising prices even though their inflation rate is only 2.4%.

## Major Threats to Well-Being and Economic Conditions

	% Major threat		% Major threat		% Major threat	
	Lack of jobs	Unemployment rate	Size of national debt	Gross national debt as % of GDP	Rising prices	Inflation rate
	%	%	%	%	%	%
Britain	87	8.2	72	82.5	67	4.3
France	89	10.0	80	86.3	74	2.4

U.S.	82	8.2	71	102.9	64	2.3

European unemployment rate and inflation rate from Eurostat. European gross national debt as a percentage of GDP from the IMF. U.S. unemployment and inflation rate from the Bureau of Labor Statistics. U.S. gross national debt from IMF.

Gross national debt figures are from 2011. Inflation rate and unemployment rate are from March 2012, except unemployment figures for Britain and Greece are from January 2012.

PEW RESEARCH CENTER Q41a-c.

Americans also fret about all of these economic challenges. But they are markedly less worried than Europeans about both the national debt (71% concerned compared with 81% in Europe) and inflation (64% worried compared with 74% in Europe).

### Little Faith in Leaders or Policies

Europeans have little faith in the ability of most of their leaders to deal with current economic challenges. Nor do they put much stock in many of the economic policy options now being pursued.

At the time the survey was taken in late March and early April, only minorities of the public in Spain (45% for Prime Minister Mariano Rajoy), Greece (32% for Prime Minister Lucas

## Views Mixed on Leaders' Handling of EU Economic Crisis

British respondents were asked about Prime Minister David Cameron. German respondents were asked about Chancellor Angela Merkel. French respondents were asked about President Nicolas Sarkozy. Spanish respondents were asked about Prime Minister Mariano Rajoy. Italian respondents were asked about Prime Minister Mario Monti. Greek respondents were asked about Prime Minister Lucas Papademos. Polish respondents were asked about Prime Minister Donald Tusk. Czech respondents were asked about Prime Minister Petr Necas.

PEW RESEARCH CENTER Q42a-d.

Papademos), Poland (25% for Prime Minister Donald Tusk) and the Czech Republic (25% for Prime Minister Petr Necas) thought their country's leader was doing a good job handling the European economic crisis. About half of the British (51%) gave Prime Minister David Cameron good marks on this issue, while 48% of Italians said the same about Prime Minister Mario Monti. But weeks before he lost his bid for reelection, French President Nicolas Sarkozy still enjoyed the confidence of 56% of the French public for his management of the crisis.

In stark contrast, 80% of Germans thought Chancellor Angela Merkel had done a good job as an economic manager. Such appreciation for her acumen extends across most of the European countries surveyed. Strong majorities in six of the other seven nations said she was doing a fine job. Only the Greeks demurred. Just 14% gave her good marks.

Despite their widespread concern about national debt, Europeans evidence little support for further fiscal austerity in their ongoing debate about government spending. In five of seven nations, clear majorities say fiscal belt tightening is about right or has gone too far. This is particularly true in Spain (73%) and Britain (71%).

But Europeans are divided on the question of whether financial assistance should be provided to EU countries that run into major financial difficulties. In richer EU member countries – Britain (62%), France (56%) and Germany (48%) – close to half or more of the population opposes their government providing bailouts. As might be expected, in poorer EU nations, most say other EU governments should provide assistance to struggling nations.

---

### Divided Views of Government Spending, Assistance and EU Authority Over Budgets

	<b>Efforts to reduce government spending have gone too far/ about right</b>	<b>EU/our government should NOT provide assistance to other countries</b>	<b>Oppose more EU authority over member countries' budgets</b>
	%	%	%
Britain	71	62	75
France	54	56	51
Germany	60	48	56
Spain	73	8	54
Italy	57	13	40
Greece	--	7	75
Poland	32	26	50
Czech Rep.	61	38	73

Due to an administrative error, results for Q43 for Greece are not reported.

PEW RESEARCH CENTER Q11, Q43, Q83, & Q83b.

---

There is general resistance to the recent decision to grant the European Union the authority to exercise limited oversight of national budgets. Three-quarters of the British (75%), Greeks (75%) and Czechs (73%) oppose this loss of national sovereignty.

## A Europe Divided?

At a time when it faces its most serious economic challenge since its creation, the European Union is, in some ways, fractured into multiple, often discordant, elements. But these divisions do not always cut along presumed lines. Germans stand alone in their perceptions of their recent experience, their attitudes toward European unity and, in the eyes of their fellow Europeans, in terms of their character traits. But, contrary to their popular portrayal, the Germans do not differ markedly from other Europeans on policy issues. On many counts, it is the Greeks who are the most isolated in Europe. Meanwhile, a north-south split within Europe is far from clear cut.

The public mood in Germany is considerably more positive than elsewhere in Europe. They are the only Europeans surveyed who are satisfied with the direction of their country and who think their economy is doing well.

Germany is the only country where a majority of the population currently thinks that European economic integration has strengthened the national economy. Germans are most likely, by far, to say that EU membership has been a good thing. They are the least concerned about the lack of jobs, rising prices and the power of unions.

Germany is the most admired country in the EU and its chancellor the most respected leader. The Germans are seen by others as the most hard-working of Europeans and as the least corrupt.

But in public policy debates – over austerity, bailouts and budgetary sovereignty – German attitudes do not differ greatly from those of other Europeans.

---

### Germany vs. EU

	Germany	EU median*
	%	%
Satisfied with country direction	53	14
Economy is good	73	15
Country strengthened by EU integration	59	31
EU favorable	68	59
ECB favorable	40	38
Better off in free market economy	69	50
Austerity not gone far enough	37	36
Support more EU budget oversight	42	36

\* Excludes Germany.

PEW RESEARCH CENTER Q2, Q8f, Q8o, Q11, Q14, Q26, Q35, & Q43.

---

Anti-German sentiment is most prevalent in Greece, where a majority (78%) has an unfavorable opinion of Germany, with nearly half (49%) of the population saying they have a *very* unfavorable view. Greece is the only country where a majority (84%) thinks German Chancellor Angela Merkel is doing a bad job dealing with the economic crisis. And they are intensely critical: 57% say she is doing a *very* bad job. The Greeks are, by far, the most likely to think that the power wielded over their economy by Germany and other European Union countries poses a major threat to their economy. And the Greeks are the least likely among Europeans surveyed to say the Germans are hardworking.

Their anti-German sentiment is only one measure of how Greeks and their country are isolated within Europe. None of Greece's fellow EU members hold a positive view of the Aegean nation. And, since 2010, favorable views of Greece have fallen by 28 points in Poland, 20 points in France, 16 points in Spain, 13 points in Germany and 12 points in Britain.

The Greeks are the least happy with the direction of their country and the most upset about the state of their national economy among the European populations surveyed. They are the least optimistic about the economy and the most pessimistic about economic mobility. They are among the most fearful about unemployment, debt and inflation and the least supportive of the free market system. Greeks are the most critical of European economic integration and the European Central Bank. They are the most supportive of bailouts and among the most opposed to outsiders looking over their shoulder as they prepare their national budget. At the same time, seven-in-ten Greeks (71%) have a favorable view of their own country. Only the Germans (82%) and the British (78%) are more nationalistic. And 60% of the Greeks see themselves as the most hardworking people in Europe.

**Greece Isolated**

	<b>Greece</b> %	<b>EU</b> <b>median*</b> %
Satisfied with country direction	2	29
Economy is good	2	16
Economy improve in next 12 months	9	22
Very difficult for young person to find job/become wealthier	73	44
Country strengthened by EU integration	18	36
Better off in free market economy	44	53
ECB favorable	15	39

\* Excludes Greece.

PEW RESEARCH CENTER Q2, Q4, Q8o, Q14, Q15, Q26, Q35.

The north-south divide in Europe, a topic of great concern in policy circles in Brussels, is by no means uniform. No country in northern Europe has a positive view of Greece. But Britain, France and Germany still hold positive views of Italy and Spain.

Southern Europeans are more dissatisfied than northerners with the direction of their countries, more worried about the state of their economy and the most worried about economic mobility. But southerners share with northerners their disenchantment with the results of European integration.

There is no north-south divide on coping with the crisis. As might be expected, wealthy northern countries are less supportive of financial bailouts than poorer southern nations. But there is no clear-cut division of opinion on austerity or EU oversight of national budgets. Finally, with regard to the perception of the national character of the residents of southern European countries, the British, French and Germans judge the Greeks, Italians and Spanish to be the laziest people in Europe and among the most corrupt. However, Italians and Spaniards largely share this negative image of themselves and their southern counterparts.

## About the Pew Global Attitudes Project

The *Pew Research Center's Global Attitudes Project* conducts public opinion surveys around the world on a broad array of subjects ranging from people's assessments of their own lives to their views about the current state of the world and important issues of the day. The project is directed by Andrew Kohut, president of the Pew Research Center, a nonpartisan "fact tank" in Washington, DC, that provides information on the issues, attitudes, and trends shaping America and the world. The *Pew Global Attitudes Project* is principally funded by The Pew Charitable Trusts.

Since its inception in 2001, the *Pew Global Attitudes Project* has released numerous major reports, analyses, and other releases, on topics including attitudes toward the U.S. and American foreign policy, globalization, terrorism, and democracy.

*Pew Global Attitudes Project* team members include Richard Wike (Associate Director), Juliana Menasce Horowitz, Katie Simmons, Jacob Poushter, and Cathy Barker. Other contributors to the project include Pew Research Center staff members James Bell (Director, International Survey Research), Bruce Stokes (Director, Pew Global Economic Attitudes), and Elizabeth Mueller Gross (Vice President), as well as Bruce Drake, Neha Sahgal, Carroll Doherty, and Michael Dimock. Additional members of the team include Mary McIntosh, president of Princeton Survey Research Associates International, and Mike Mokrzycki. The *Pew Global Attitudes Project* team regularly consults with survey and policy experts, regional and academic experts, journalists, and policymakers whose expertise provides tremendous guidance in shaping the surveys.

---

The *Pew Global Attitudes Project's* co-chairs are on leave through 2012. The project is co-chaired by former U.S. Secretary of State Madeleine K. Albright, currently principal, the Albright Stonebridge Group, and by former Senator John C. Danforth, currently partner, Bryan Cave LLP.

All of the project's reports and commentaries are available at [www.pewglobal.org](http://www.pewglobal.org). The data are also made available on our website within two years of publication. Findings from the project are also analyzed in *America Against the World: How We Are Different and Why We Are Disliked* by Andrew Kohut and Bruce Stokes, published by Times Books. A paperback edition of the book was released in May 2007.

## 1. National Conditions and Economic Ratings

The persistence and depth of the European economic downturn triggered by the euro crisis has had a profoundly adverse impact on most Europeans' attitudes toward the condition of their national economies. People are almost universally dissatisfied with the state of their nations. Only the Germans are satisfied with the direction of their country and the state of their national economy. Europeans blame the banks and their own governments for their troubles. And none, not even the Germans, expect conditions to improve over the next year. Asked about their economic worries, Europeans are especially concerned about joblessness, public debt and inflation.

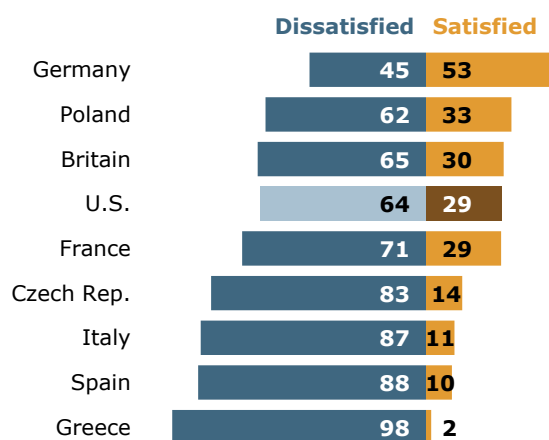

### Widespread Dissatisfaction

In the fourth year of the global financial crisis, there is widespread public dissatisfaction in seven of the eight European nations surveyed. Just a small fraction of Europeans are happy with the direction of their nation. Only in Germany (53%) is more than half the population content with national conditions. The mood is particularly grim in Greece, where just 2% of Greeks are satisfied.

There is, however, not much change in national sentiment from last year in five countries where there is comparable data. Sentiment is roughly unchanged in Britain, Poland, Spain and France. Only in Germany have assessments improved significantly, from 43% in 2011 to 53% in 2012.

Compared with 2007, before the crisis hit, national satisfaction today is down by 41 points in Spain and nine points in the Czech Republic. At the same time, it is up 20 points in Germany (from 33% to 53%), up 15 points in Poland (from 18% to 33%) and up seven points in France (from 22% to 29%).

### Many Dissatisfied With Country Direction

PEW RESEARCH CENTER Q2.

National dissatisfaction is a shared transatlantic phenomenon. Only 29% of Americans are satisfied with the way things are going in their country. That figure is up eight points from 2011.

### Satisfaction With Country Direction

	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012

PEW RESEARCH CENTER Q2.

### Economic Gloom

National discontent is rooted in an extremely gloomy assessment of local economic conditions, especially in southern Europe. Only 2% of the Greeks and 6% of the Italians and Spanish describe the current economic situation in their countries as good. But economic perceptions are not that much better in most of northern or eastern Europe. Only 15% of the British, 16% of the Czechs, 19% of the French and 29% of the Poles say their economy is doing well.

And economic despair is profound. An overwhelming 78% of the Greeks and 72% of the Spanish think their national economic

### Current Economic Conditions

PEW RESEARCH CENTER Q14.

performance is “very bad,” as do 56% of Italians. And that strongly negative Italian assessment has increased 28 percentage points since the fall of 2009.

In most countries, the public’s economic assessment has declined since 2007, before the economic crisis began, although a majority of the French, Italians and Czechs have never been satisfied with their economies since Pew began surveying in 2002. In Germany and Poland, on the other hand, public economic sentiment has been on a roller coaster ride, with wide mood

**Bleak Assessment of National Economic Conditions**

	% Very/somewhat good						
	2002	2007	2008	2009	2010	2011	2012
	%	%	%	%	%	%	%

\* Data from Fall 2009 survey.  
PEW RESEARCH CENTER Q14.

swings, often from one year to the next, for the last decade. At the moment, the Germans could not be more pleased about economic conditions. Nearly three-quarters (73%) say their economy is good, up 45 points from the spring of 2009.

By comparison, while less than a third (31%) of Americans say economic conditions are good, that is up 13 points from last year. That economic assessment, while anemic, is still better than that in most European countries surveyed. It is, however, far less than the half of Americans who were satisfied with the economy in 2007, before the Wall Street debacle.

**Personal Finances Deteriorating**

Europeans generally say that their personal economic situation is much better than their perception of their own national economic conditions. But even that more positive assessment has deteriorated sharply since 2009 in many countries. Half or more of those in five of the eight nations surveyed say their economic condition is good, including Germany (74%), France (65%) and Britain (64%). But that sentiment is down 12 percentage points in Spain, 10 points in Britain and Poland and eight points in France since 2009. Personal economic assessments are unchanged in Germany.

Like their European counterparts, Americans feel better about their own finances than about the condition of the U.S. economy, although the percentage of Americans describing their personal economic circumstances as good has slipped from 76% in 2009 to 68% today.

Europeans are less sanguine about how their current personal finances stack up against how they and their families were doing five years ago. A majority of the Greeks (81%) and the Spanish (60%) feel they are doing worse off. And a plurality of the French, Italians, British, Czechs and Poles agree. The Germans say their family finances are about the same as five years ago. Nearly four-in-ten Americans (38%) say their situation is about the same, while 34% say it is worse and 27% describe their current financial situation as better.

### Change in Personal Economic Situation

	% Good		
	2009 %	2012 %	Change
Spain	69	57	-12
Britain	74	64	-10
Poland	55	45	-10
France	73	65	-8
Germany	74	74	0
Czech Rep.	--	50	--
Italy	--	41	--
Greece	--	17	--
U.S.	76	68	-8

PEW RESEARCH CENTER Q18.

### Blame the Banks and the Government

Europeans' assessment of their economies' performance varies, as does who they blame for current economic conditions. Among those who say their economy is bad, people in four countries – the Czech Republic (91%), Poland (90%), Greece (87%) and Italy (84%) – overwhelmingly say their own governments are responsible for current economic problems. In two other European nations, Spain (78%) and France (74%), people put the onus on the banks and other major financial institutions. And in two countries, opinion is more divided: Britain (69% fault the banks, 67% blame their government) and Germany (74% blame banks, 70% fault the government).

### Who's to Blame for Current Economic Problems?

	Banks, financial institutions				
	Our gov't %	U.S. %	EU %	Our- selves %	
Czech Rep.	91	27	5	39	21
Poland	90	39	5	28	15
Greece	87	39	4	19	42
Italy	84	58	2	15	19
Germany	70	74	12	25	9
Britain	67	69	10	16	19
Spain	59	78	8	19	26
France	59	74	10	37	18

Asked only of people who said economy was "bad" in Q14.

Total adds to more than 100% because of multiple responses.

"Who is most to blame for (survey country's) current economic problems? Is it..." & "Who is second most to blame for (survey country's) current economic problems?"

PEW RESEARCH CENTER Q16 & Q17.

In Britain, France, Germany and Spain, people ages 18-29 are especially likely to blame their own government. In Britain, France and Spain the people most judgmental of financial institutions are those 50 years of age and older.

Public assessments of the state of the nation, the economy and who is to blame often are rooted in a person's politics and can divide along ideological lines. In Britain, France and the Czech Republic, countries with center-right governments when the survey was taken, people on the left are more dissatisfied with national conditions and the state of the economy than those on the right. In Greece, Spain and Italy, unhappiness with the national state of affairs and the economy is so profound that it transcends political leanings.

### Pessimism About the Future

Looking forward, Europeans are uniformly downbeat about the future. Only 9% of the Greeks, 13% of the Czechs and 18% of the Poles expect the economic situation to improve over the next 12 months. Economic optimism is not much more widespread in France (22%), Italy (22%), Spain (25%) or Germany (29%). An overwhelming majority (81%) of Greeks actually expect the economy to worsen, including 53% who say it will worsen *a lot*. A majority of the Czechs (60%) and a plurality of the Spanish (47%) and the Italians (47%) also see things going downhill. Views about the future of the economy are relatively unchanged in most of Europe since 2011. But notably they are down nine points in Germany from last year.

#### Over Next 12 Months, Will the Economic Situation...

PEW RESEARCH CENTER Q15.

Current American optimism about the economy clashes sharply with European pessimism. Roughly half (52%) of all Americans see the U.S. economy getting better over the next year, up 10 percentage points from 2011.

On a more personal level, Europeans are similarly gloomy about potential economic mobility for their children. Strong majorities of the Greeks (73%), the Spanish (69%) and the Italians (62%) think it will be *very difficult* for a young person in their country to get a better job and to become wealthier than his or her parents. Americans generally share Europeans' pessimism for their children, although less intensely.

### Upward Mobility Difficult For Young People in Southern Europe

Question read, "How easy or difficult is it in our country for a young person to get a better job and to become wealthier than his or her parents were – very easy, somewhat easy, somewhat difficult or very difficult?"

PEW RESEARCH CENTER Q4.

Nevertheless, this pessimism should be seen in context. Compared with their parents at their same age, majorities in most European countries think that their own standard of living is better than that of the previous generation. This includes 71% of the Spanish, 70% of the Germans and even 57% of the Greeks. Among the countries surveyed, only the French (48%) are not sure they live better than their parents. Six-in-ten Americans say they are better off than their elders, a total roughly comparable to the European median (59%).

### Shared Economic Troubles

Troubled about their economies and their economic future, Europeans fret in overwhelming numbers about the three horsemen of economic anxiety: unemployment, debt, and inflation, as well as the power of the banks, but not trade unions.

## Major Threats to Economic Well-Being

<i>% Major threat</i>	<b>Lack of jobs</b>	<b>Size of national debt</b>	<b>Rising prices</b>	<b>Power of banks</b>	<b>Trade unions</b>	<b>Greece and Italy's econ problems</b>	<b>German/EU power over our economy</b>	<b>Economic problems in Europe</b>
	%	%	%	%	%	%	%	%
Britain	87	72	67	65	24	54	--	--
France	89	80	74	68	21	64	--	--
Germany	70	77	56	78	10	71	--	--
Spain	97	83	74	80	32	--	47	--
Italy	95	81	89	74	30	--	39	--
Greece	97	97	93	88	40	--	83	--
Poland	84	78	79	58	21	56	40	--
Czech Rep.	84	82	62	56	18	58	46	--
<b>MEDIAN</b>	<b>88</b>	<b>81</b>	<b>74</b>	<b>71</b>	<b>23</b>	<b>58</b>	<b>46</b>	<b>--</b>
U.S.	82	71	64	52	26	--	--	41

PEW RESEARCH CENTER Q41a-h.

Overall, Europeans are most worried that the lack of jobs poses a major threat to their national economic well-being, with concern the highest in Spain (97%), Greece (97%) and Italy (95%). Only in Germany does apprehension over the size of the national debt (77%) trump the fear of joblessness (70%). Debt is generally the second most troubling economic issue. In most countries, women are especially worried about public indebtedness.

Inflation fears outstrip debt worries in Italy and run neck and neck in Poland. In Germany, the Czech Republic, and France, the less educated are generally more concerned about rising prices than the more educated. Despite their national trauma with hyperinflation in the 1920s, Germans (56%) are less likely than the other Europeans surveyed to worry about rising prices.

The Greeks, with the worst performing economy in Europe, are overwhelmingly worried about all these threats to their well-being.

Americans share these European concerns. And they agree that a lack of jobs is a greater threat than public debt or inflation. But Americans are less likely to be worried about each of these issues than are the Europeans. Roughly seven-in-ten Americans (71%) fret about the size of the national debt. The percentage of Europeans who share this concern is even higher. Nearly two-thirds of Americans (64%) fear inflation; again, the concern in all but two of the European countries surveyed is higher. But unease about the national debt is far more likely to be a partisan issue in the United States than it is in Europe. Europeans, whatever their political leanings, tend to see indebtedness the same way. The left-right divide in concern is

five percentage points in Germany, four in France, and three in Britain. It is 20 points in the United States, with only 59% of liberals ranking debt as a major threat to the economy compared with 79% of conservatives.

## **Structural Threats to Economic Well-Being**

Among institutional and structural threats to national economic well-being, Europeans are more than three times as likely to worry about the power of banks and financial institutions as they are to be concerned about the power of trade unions. The Greeks (88%) are the most concerned about the power of the banks, as well as the influence of labor unions (40%). Notably, Americans are generally less likely than Europeans to think financial institutions imperil national economic well-being. Twice as many people in the United States are concerned about the influence of the banks as fret about the power of unions.

At a time of economic turmoil and anxiety throughout Europe, northern Europeans are less likely to acknowledge their economic interconnectedness than are southern and eastern Europeans. Majorities in France (60%), Germany (57%) and Britain (55%) say what happens in other European Union countries does not affect their own personal well-being. Half or more in Greece (82%), the Czech Republic (60%), Poland (55%), Italy (51%) and Spain (50%) think their personal fortunes are inextricably linked to developments elsewhere.

But, when asked about specific external economic threats, majorities in northern and eastern Europe think the economic woes of countries like Greece and Italy pose a major risk to the economic fortunes of their countries. This concern is especially strong in Germany (71%). And conservatives in France are more likely than those on the left to harbor such qualms.

Meanwhile, Greeks overwhelmingly believe the power of Germany and other EU nations seriously endangers their economic welfare – 83% say this is a major threat. Less than half, however, in Spain (47%), the Czech Republic (46%), Poland (40%) and Italy (39%) hold this view.

Fears of European economic turmoil have yet to cross the Atlantic. Only 41% of Americans think the economic problems in Europe pose a major threat to the U.S. economy.

## Free Market Support Falling

One casualty of the euro crisis has been support for capitalism in Europe, especially in some countries most adversely impacted by the economic downturn. Around half the population in Spain (52%) and Greece (50%) do not believe that people are better off in a free market economy. And since 2007, before the global financial downturn, support for the free market system has fallen by 23 points in Italy, 20 points in Spain and nine points in the Czech Republic. But belief in capitalism has also fallen 15 points in Poland over that time period, when the Polish economy was doing relatively well.

Majorities in Germany (69%), Britain (61%) and France (58%) still believe that most people are better off in a free market economy, even though some people are rich and some are poor. Europeans with a college education are generally favorable toward capitalism. Men are generally more supportive than women. In Britain, France, the Czech Republic and Greece, those on the political right have a more positive view of free markets than do those on the left.

### Most People Better Off in Free Market Economy

PEW RESEARCH CENTER Q26.

## 2. Views of European Unity

The euro crisis has led Europeans to become very judgmental about elements of the European project: economic integration, membership in the European Union, the EU as an institution, the European Central Bank and use of the euro as their currency. But, as yet, euro zone publics want to keep the euro. As economic conditions have worsened, growing numbers of Europeans say economic integration, which first began with creation of the European Community in 1957, has weakened, not strengthened their national economy.

Assessment of the EU as an institution, while generally positive, has fallen, especially in eastern and southern Europe. Many are critical of the European Central Bank. And in none of the euro area countries surveyed does a majority think the common currency has been good for their nation. Moreover, nations that have yet to adopt the euro are very glad they have waited. Nevertheless, there is no support in the euro zone for going back to national currencies. In general, support for the European project tends to be stronger among those with a college education.

### Most Say Economic Integration Has Weakened the Economy

Creation of an integrated European market that would create a cornucopia of benefits for consumers and businesses has long been a European goal. But today, majorities in five of eight countries surveyed think that such economic integration has actually weakened their nation's economy. This negative assessment is particularly strong in Greece (70%), France (63%), Italy (61%) and Britain (61%). In addition, the Spanish are divided on the issue. Germany is now the only society where a healthy majority (59%) think integration has actually bolstered their economy.

#### Growing Belief that National Economy Weakened by Economic Integration of Europe

	% Saying overall economy weakened by economic integration of Europe			
	2009	2010	2012	09-12 Change
	%	%	%	
Czech Rep.	37	--	59	+22
Italy	41	--	61	+20
Spain	32	41	50	+18
France	55	63	63	+8
Britain	54	57	61	+7
Poland	28	16	29	+1
Germany	43	48	39	-4
Greece	--	--	70	--

PEW RESEARCH CENTER Q35.

Women in Germany, Spain and the Czech Republic are more likely than men to say integration has been bad for the local economy. Moreover, concern about the impact of creating a single European market breaks sharply along

educational lines. By a large margin, less educated people in France, Germany, Spain and the Czech Republic say integration has weakened their economy. Better educated people say it has boosted the economy.

In Spain, where roughly half the younger population is jobless, it is people 18 to 29 years old who are more likely than people 30 years of age and older to say business and commercial integration with the EU has worsened the economy. In the Czech Republic, it is older people who hold such critical views.

Since 2009, such negative sentiment has increased in five of the seven countries where there is comparable data, especially in the Czech Republic (up 22 points), Italy (up 20 points) and Spain (up 18 points).

### Questioning EU Membership

Doubts about European integration have led many Europeans to second guess their own country's EU membership. By far, Germans (65%) are the most likely to say membership is a good thing for their country. Only about half hold that view in Spain (54%), France (48%), and Poland 48%, and in Greece just 43% still say membership is positive. The British are almost equally divided. A plurality of the Czechs say the EU has been neither a good nor a bad thing for their country. Since 2009, positive sentiment about EU membership is down 17 points in the Czech Republic, 15 points in Poland and 13 points in Spain. People with a college education are most likely to see participation in the EU in a favorable light.

#### Membership in EU Good Thing?

	% Good thing		
	2009	2012	Change
	%	%	
Czech Rep.	45	28	-17
Poland	63	48	-15
Spain	67	54	-13
Italy	47	40	-7
France	54	48	-6
Britain	31	30	-1
Germany	63	65	+2
Greece	--	43	--

PEW RESEARCH CENTER Q34.

### Erosion of EU Support

Second thoughts about economic integration and EU membership have also eroded the stature of the European Union, the symbolic institutional representation of the European project. The

Brussels-based institution still maintains majority support in five of the eight European countries surveyed. The most favorably disposed are the Poles (69%) and the Germans (68%). But just 34% of the Czechs, 37% of the Greeks and 45% of the British have a favorable impression of the EU.

### EU Favorability Waning

	% Favorable					07-12 Change
	2007	2009	2010	2011	2012	
	%	%	%	%	%	
Spain	80	77	77	72	60	-20
Czech Rep.	54	--	--	--	34	-20
Italy	78	--	--	--	59	-19
Poland	83	77	81	74	69	-14
Britain	52	50	49	51	45	-7
France	62	62	64	63	60	-2
Germany	68	65	62	66	68	0
Greece	--	--	--	--	37	--

PEW RESEARCH CENTER Q8f.

EU favorability is down almost everywhere from 2007, before the euro crisis began, having fallen 20 points in the Czech Republic and Spain, 19 points in Italy and 14 points in Poland. Those with a college education tend to favor the EU more than those who have no college degree.

### Thumbs Down on the European Central Bank

Half or more of the populations in four of the five euro area countries surveyed have a negative view of the European Central Bank, including 80% of the Greeks, 65% of the Spanish, 53% of the French and 51% of the Germans. Among non-euro area nations, 54% of the Poles actually have a positive opinion of the ECB, the only people in the survey to hold such views. The Czechs are divided. And a plurality (44%) of the British have an unfavorable opinion of the Frankfurt-based institution.

### European Central Bank Generally Seen In Unfavorable Light

PEW RESEARCH CENTER Q8o.

## Ambivalence About the Euro

Doubt about the European Central Bank is mirrored by ambivalence about the euro, the common currency of 17 European nations. In no country among the five euro area nations surveyed is there a majority who thinks that the currency has been good for them. In two, Greece (46%) and Germany (44%), a plurality still believe having the euro has been positive for their country. However, in Italy (44%) and France (40%), a plurality of the population now actually thinks the euro has been a bad thing. Men are more likely than women to say the euro has been a good thing, as are people with a college education.

### Non-Euro Countries Happier with Currency Than Euro Nations, But...

	<b>Good thing</b>	<b>Bad thing</b>	<b>Neither</b>	<b>DK</b>
<i>% Saying having euro is...</i>	%	%	%	%
Greece	46	26	28	1
Germany	44	31	23	1
Spain	37	41	22	1
France	31	40	29	0
Italy	30	44	24	2
<i>% Saying <b>not</b> having euro is...</i>				
Britain	73	7	18	1
Czech Rep.	62	15	21	2
Poland	54	23	17	6

PEW RESEARCH CENTER Q95 & Q96.

There is no ambivalence about the euro among populations that do not currently use it as their currency. Solid majorities in Britain (73%) and the Czech Republic (62%) say not having the euro has proven beneficial for their country, as do 54% of Poles.

## But Keep It!

Nevertheless, there is no appetite for abandoning the euro and returning to previous national currencies in any of the euro area countries surveyed. Strong majorities in Greece (71%), France (69%) and Germany (66%) want to keep the common currency. Even in Spain, where support for the euro has fallen nine percentage points since 2009, 60% of the population still stands behind the currency. And roughly half of Italians (52%) are similarly committed to it.

### Majorities Say Keep the Euro

	<b>Keep euro</b>	<b>Return to currency*</b>	<b>DK</b>
	%	%	%
Greece	71	23	6
France	69	31	0
Germany	66	32	2
Spain	60	36	4
Italy	52	40	7

\* In France, question asked about franc; in Germany mark; in Spain peseta; in Italy lira; in Greece drachma.

PEW RESEARCH CENTER Q67.

Less than a quarter of the Greeks (23%) want to return to using the drachma. And about a third of the French (31%) pine to revive the franc. Similarly, only about a third of the Germans (32%) call for a reissuing of the mark. The college educated are consistently more supportive of the euro, except in Greece. Notably, it is older people in Spain and France who are especially supportive of the single currency.

### 3. Taming the Crisis

Austerity, bailouts and increased outside scrutiny of national budgets have been, so far, the principal policy responses to the euro crisis. These efforts receive mixed grades from European publics. They are divided over the fiscal belt-tightening to date and most question the need for further spending cuts. Richer northern European nations are skeptical about aiding EU member states in need. Poorer southern and eastern countries back such financial assistance. There is almost no support for the recently agreed upon pact giving Brussels greater oversight of national budgets.

#### Divisions Over Austerity

Debate over cuts in government spending have been the focal point of European politics in recent months. European citizens are divided on the efficacy of austerity. Among the nations surveyed, a median of 37% say cuts have not gone far enough, 37% say they have gone too far and 25% say they have been about right.

Roughly half in Poland (52%) and France (46%) say their country's efforts to reduce government spending have not cut deep enough. A plurality in Spain (43%) and the Czech Republic (45%) say belt-tightening has been excessive. And Italians are divided on their government's efforts.

---

#### Divided on Current Spending Cuts, But Enough is Enough

	<b>Gone too far</b>	<b>About right</b>	<b>Not far enough</b>
	%	%	%
Spain	43	30	25
Britain	37	34	26
Czech Rep.	45	16	34
Germany	22	38	37
Italy	37	20	38
France	29	25	46
Poland	20	12	52

Due to an administrative error, Q43 is not reported for Greece.

PEW RESEARCH CENTER Q43.

---

These findings reflect conditions on the ground in each of these nations. In France, nominal government expenditures have increased throughout the crisis, so there have been no cutbacks in public spending. The plurality of the left in France that thinks austerity has gone too far may reflect anxiety about anticipated cuts and could help explain their support for the new French president, Francois Hollande, who has promised some increases in spending. In Spain, concern that austerity has gone too far tracks with the fact that government expenditures have gone down both in real terms and as a per cent of GDP every year since 2009.

The view that spending cuts have gone too far is especially common on the left in the Czech Republic, Britain, Spain and France – all nations ruled by center-right governments at the time of the survey. But there is no real ideological divide on budget cutting in Italy, Germany and Poland.

Public support for further austerity is questionable, however. Majorities in five of the seven countries surveyed say efforts to reduce government spending are about right or have gone too far. This includes strong majorities in Spain (73%) and Britain (71%) and a lesser majority in Italy (57%).

### Mixed Views on Bailouts

Assistance to EU countries that have major financial problems has been a key element of Europe's response to the euro crisis. Bailouts have been provided to Greece, Ireland and Portugal. But such aid is not popular in countries that have been donors.

A strong majority of the British (62%) are against EU assistance to troubled member countries. A majority of the French (56%) also oppose it, while the Germans are divided (48% oppose, 49% support). A majority or plurality of the left in all three northern countries support such assistance. But only a minority of the right and the center back aid.

Public attitudes toward bailouts are in flux.

Opinion has flip flopped in France. In 2010, 53% supported assisting others in distress. In 2012 a majority (56%) oppose such aid.

### Austerity by Ideology

*% Gone too far to reduce government spending*

	<b>Total</b>	<b>Left</b>	<b>Center</b>	<b>Right</b>
	%	%	%	%
Czech Rep.	45	59	51	31
Spain	43	51	34	34
Britain	37	58	36	26
Italy	37	38	36	35
France	29	46	28	19
Germany	22	25	18	22
Poland	20	22	18	22

Due to an administrative error, Q43 is not reported for Greece.

PEW RESEARCH CENTER Q43.

### North-South Divide on Bailouts

	<b>Yes</b>	<b>No</b>	<b>DK</b>
	%	%	%
Germany	49	48	4
France	44	56	0
Britain	34	62	4
Greece	91	7	3
Spain	90	8	2
Italy	79	13	9
Poland	63	26	11
Czech Rep.	55	38	8

In Britain, France, and Germany the question wording was, "Do you think the (survey country) government should provide financial assistance to other European Union countries that have major financial problems?"

In Czech Republic, Greece, Italy, Poland, and Spain the question wording was, "Do you think other European Union governments should provide financial assistance to member countries that have major financial problems?"

PEW RESEARCH CENTER Q83 and Q83b.

Over the same time period, German support for such assistance actually rose from 42% in 2010 to 49% today. This may reflect the fact that Germans are feeling much better about their own economy. And those who feel good about the German economy are much more likely to be willing to provide financial assistance to other European Union countries in distress than are Germans who think their economy is doing poorly.

As might be expected, people in southern European countries that are recipients or potential beneficiaries of aid – Greece (91%), Spain (90%), and Italy (79%) – overwhelmingly favor other European Union governments providing financial assistance to EU member countries that experience major financial problems.

It is notable, however, that eastern Europeans, who are currently not considered candidates for bailouts – Poland (63%) and the Czech Republic (55%) – also back such aid. These nations were the beneficiaries of considerable assistance when they first joined the EU.

### Likely Donors: Partisan Split on Providing Financial Assistance

*% EU members should provide assistance*

	<b>Total</b>	<b>Left</b>	<b>Center</b>	<b>Right</b>
	%	%	%	%
Greece	91	86	93	93
Spain	90	88	92	92
Italy	79	90	81	77
Poland	63	63	61	72
Czech Rep.	55	61	55	50
Germany	49	56	48	46
France	44	53	44	40
Britain	34	57	30	30

\*In Britain, France and Germany, the question wording was "Do you think the (survey country) government should provide financial assistance to other European Union countries that have major financial problems?"

In Czech Republic, Greece, Italy, Poland and Spain the question wording was "Do you think other European Union governments should provide financial assistance to member countries that have major financial problems?"

Greece	21	75	5
Britain	18	75	7

PEW RESEARCH CENTER Q11.

## Concern Over Loss of National Budgetary Sovereignty

Clear majorities in four of the eight EU nations surveyed oppose giving the European Union more authority over the national budgets of member countries. Such budgetary deferral to Brussels is a key element in the European Union Treaty on Stability, Coordination and Governance in the Economic and Monetary Union – known as the Fiscal Pact – that comes into force January 1, 2013. Opposition to the loss of sovereignty over the domestic budget is found in Germany (56%) and Spain (54%) and is overwhelming in Britain (75%) and the Czech Republic (73%), where the governments have refused to sign the Fiscal Pact. (Their participation is not needed for the treaty to come into force.) Opinions are roughly divided in France (51% oppose, 49% favor) and Italy (40% oppose, 45% favor).

There is no clear-cut, European-wide ideological split over budgetary sovereignty. It is the right in Britain (81%) who most strongly oppose EU oversight of the national budget. But it is the left who oppose such supervision in Spain.

### Nationality Not Ideology Determines Opposition to Loss of Budgetary Sovereignty

*% Oppose giving EU more authority over budgets*

	<b>Total</b>	<b>Left</b>	<b>Center</b>	<b>Right</b>

Poland	50	49	55	53
Italy	40	39	39	43

PEW RESEARCH CENTER Q11.

## 4. Views of EU Countries and Leaders

The euro crisis has hit the southern European nations surveyed (Greece, Italy and Spain) much harder than the northern (Britain, France and Germany) or eastern countries, (Poland and the Czech Republic). But it is Greece's reputation, more than that of Italy and Spain, that has suffered the most in the eyes of the public. German Chancellor Angela Merkel receives the highest marks among leading European officials for her handling of the euro crisis, except in Greece. And Germans are among the most judgmental of Greece. The Spanish are the most critical of themselves while the Greeks are the least self-critical.

### Germany Favored, Greece Not

Germany is the most respected EU country among those nations surveyed. Roughly eight-in-ten people in France (84%), the Czech Republic (80%) and Poland (78%) hold a favorable view of Germany. The Greeks, however, are harshly critical of Germany. Only 21% have a positive view of Germany, while 78% have an unfavorable view. Berlin's hard line in dealing with the euro crisis may have cost it some support among its fellow EU members. Germany's favorability is down 10 points in Spain since 2011, down six points in France and Britain.

France is also held in high regard. Overwhelming majorities in Germany (80%), Poland (76%) and the Czech Republic (74%) express a positive view of France. Only the Greeks (54%) and the Italians (53%) are sparing in their praise. However, in a possible sign of intra-European tension as a result of the euro crisis, positive Italian assessment of France has fallen 20 percentage points since 2007, as has favorable sentiment toward France in the Czech Republic (-11) and Spain (-9).

---

#### Ratings of Countries

	% Favorable					
	Germany	France	Britain	Italy	Spain	Greece
	%	%	%	%	%	%
Britain	72	64	78	67	74	48
France	84	64	76	67	71	45
Germany	82	80	67	66	71	27
Spain	75	68	70	58	45	34
Italy	67	53	69	57	59	30
Greece	21	54	37	68	72	71
Poland	78	76	83	69	76	43
Czech Rep.	80	74	84	68	69	25

PEW RESEARCH CENTER Q8i-n.

---

Strong majorities in seven of the eight countries surveyed have a favorable view of Britain, including 84% in the Czech Republic and 83% in Poland. And these views are largely unchanged from 2007. Only in Greece do people lack enthusiasm: just 37% of Greeks see Britain in a good light.

Spain is broadly popular. About seven-in-ten or more people in most of the countries surveyed have a favorable opinion of Spain, including 76% in Poland, 74% in Britain and 72% in Greece. The Italians (59%) evidence less enthusiasm.

Despite its recent troubles, roughly two-thirds of Europeans surveyed have a positive view of Italy, including 67% of the British, 67% of the French and 66% of the Germans. Only the Spanish, at 58%, are slightly less supportive. But in a sign that Italy's problems may have affected other Europeans' views of the country, the Polish assessment is down 15 points from 2010, as is the Spanish (-11), the French (-10), and the British rating (-6). Italy fares relatively poorly among its own people in opinions of the country: 57% of Italians rate their nation favorably.

Among the major European countries, Greece is clearly the least popular. And its reputation is slipping. In no country, other than Greece itself, is there a majority with a favorable view of Greece. Only 25% of the Czech's have a positive opinion of the Aegean nation. Polish favorable rating of Greece has fallen 28 points since 2010, Spanish ratings of Greece are down 16 points and favorability of Greece among the British has declined 12 points. Just 27% of Germans see Greece in a positive light and that is down 13 points from 2010. In France, 45% judge Greece favorably, down 20 points from 2010. Contrary to the views of other Europeans, 71% of the Greeks have a favorable view of their own country.

### Germany in High Regard

Italy	--	30	--
Greece	--	71	--
Czech Rep.	--	25	--

PEW RESEARCH CENTER Q8j.

## Merkel Highly Respected

German Chancellor Angela Merkel is widely seen as the most effective national leader in dealing with the European economic crisis. Eight-in-ten Germans say she is doing a good job, as do about three-quarters of the French (76%) and two-thirds of the Czechs (67%), Poles (66%) and British (66%).

In Germany, Merkel is significantly more popular among older people than among the young, but in other European nations her appeal cuts across generations. Notably, there is no significant gender gap in her appeal. Her efforts are appreciated equally by men and women. In most countries, Merkel is popular across ideological lines, including support by 78% of Germans on the left. The French left is not nearly as appreciative, a difference that bears watching with a new left-of-center government in Paris. Only 54% of French respondents from the left think she is doing a good job with the crisis, 32 points lower than the approval she gets from the French right. Only in Greece (84%) does a majority think Merkel has performed poorly in the crisis. And they are harshly critical: 57% of Greeks say she has done a *very bad* job.

Recently ousted French president Nicholas Sarkozy might have fared better running in Germany than in France. While in the run-up to his re-election campaign, 56% of his fellow countrymen thought Sarkozy had done a good job dealing with the European economic crisis, 75% of the Germans thought he was handling the crisis well. Sarkozy may have fared less well in other European countries, lacking majority approval of his crisis performance in Poland (49%), Britain (46%), the Czech Republic (43%) and Italy (36%). But the Greeks are his toughest graders; only 17% say Sarkozy is doing a good job.

### Merkel Gets High Marks for Handling EU Economic Crisis

	% Good job			
	Merkel	Sarkozy	Cameron	Own leader*
	%	%	%	%
Britain	66	46	51	51
France	76	56	59	56
Germany	80	75	28	80
Spain	63	54	48	45
Italy	55	36	42	48
Greece	14	17	16	32
Poland	66	49	57	25
Czech Rep.	67	43	54	25

\* In Spain, respondents were asked about Prime Minister Mariano Rajoy. In Italy, respondents were asked about Prime Minister Mario Monti. In Greece, respondents were asked about Prime Minister Lucas Papademos. In Poland, respondents were asked about Prime Minister Donald Tusk. In Czech Republic, respondents were asked about Prime Minister Petr Nečas.

PEW RESEARCH CENTER Q42a-d.

British Prime Minister David Cameron comes in for similar criticism. Only 16% of Greeks and 28 % of Germans approve of his handling of the European economic crisis. And only 51% of his own people think he is doing a good job. The French see Cameron differently; 59% approve of his performance. In a number of countries, however, Cameron's name recognition is so low that many respondents did not voice an opinion about him.

The leaders of the other European countries surveyed come in for the most criticism. In three of the other five countries, a strong majority thinks their own leader is doing a poor job reacting to the European economic troubles. This includes Poland, where 69% criticize Prime Minister Donald Tusk; the Czech Republic, where 69% are disdainful of the efforts of Prime Minister Petr Necas; and Greece, where 62% think Prime Minister Lucas Papademos is doing a bad job. In Spain, 50% give Prime Minister Mariano Rajoy bad marks, while 45% approve of how he is handling the crisis. The Italian public is also divided on their leader's performance: 44% say Prime Minister Mario Monti is doing a bad job, 48% say a good job.

## Germans Viewed as Honest and Hardworking, Southerners Viewed Negatively

When asked to name who they think are the hardest working Europeans, the Germans are the overwhelming choice. The French (86%) hold the German work ethic in high regard, as do the Spanish (77%) and the Germans themselves (80%). Like the Germans, many respondents also give themselves high marks. The French (69%), in particular, claim to be hardworking and, to a lesser extent, so do the Poles (46%) and the British (43%). The Greeks have a similarly favorable view of their own industriousness. They are more likely to name themselves (60%) as hard workers than they are to cite the Germans (45%) or any other nationality.

### Germans and Own Country Seen as Most Hardworking

*% Saying people are the **most** hardworking in...*

	<b>Germany</b>	<b>Britain</b>	<b>France</b>	<b>Own country</b>
	%	%	%	%
Britain	54	43	23	43
France	86	37	69	69

Total adds to more than 100% because of multiple responses.

PEW RESEARCH CENTER Q50a1, Q50a2 & Q50a3 combined.

Europeans are also in agreement as to who are the least hardworking among them: it's the southern Europeans, and especially the Greeks. The Germans (60%) are harsh judges of Greek work habits, but so are the Czechs (58%), French (53%) and the Poles (50%). The French are equally judgmental of the Italians (58%) and the Spanish (50%). And even Italians and Spanish are likely to name their own countrymen and women among the least hardworking Europeans. Greeks are not so self-critical. Only 14% call themselves lazy. Instead, they name the Italians (24%), the French (23%) and the Germans (19%) as less industrious.

### Greeks, Italians, and Spanish Seen as Least Hardworking

*% Saying people are the **least** hardworking in...*

	<b>Greece</b>	<b>Italy</b>	<b>Spain</b>	<b>Own country</b>

<b>MEDIAN</b>	<b>48</b>	<b>36</b>	<b>29</b>	<b>15</b>

Total adds to more than 100% because of multiple responses.

PEW RESEARCH CENTER Q50b1, Q50b2 & Q50b3 combined.

In all eight countries surveyed, the Italians and the Greeks rank in the top three mentioned as the most corrupt. But it is the Italians who come in for particular criticism. About three-quarters (76%) of the French say the Italians are dishonest, as do 63% of the Spanish and 60% of the Germans. People often also see themselves as the most corrupt, particularly in Italy (65%) and Spain (63%). The Greeks share this self-critique. About half (52%) of Greeks say that corruption is most widespread among their fellow citizens.

### Italians, Greeks and Spanish Agree – Their Countries Most Corrupt

*% Saying people are the **most** corrupt in...*

	<b>Italy</b>	<b>Greece</b>	<b>Spain</b>	<b>Own country</b>

Total adds to more than 100% because of multiple responses.

PEW RESEARCH CENTER Q51a1, Q51a2 & Q51a3 combined.

Germans are seen as the least corrupt people in the European Union, followed by the British and the Swedes. The Germans (54%) and the French (46%) have a particular high regard for their own integrity. At the same time, respondents outside of northern Europe are more self-critical. About one-in-ten or fewer people in Spain, Italy, Greece, Poland, and the Czech Republic say their countrymen and women are the least corrupt.

## Methods in Detail

### About the 2012 Pew Global Attitudes Survey

Results for the survey are based on telephone and face-to-face interviews conducted under the direction of Princeton Survey Research Associates International. Survey results are based on national samples. For further details on sample designs, see below.

The descriptions below show the margin of sampling error based on all interviews conducted in that country. For results based on the full sample in a given country, one can say with 95% confidence that the error attributable to sampling and other random effects is plus or minus the margin of error. In addition to sampling error, one should bear in mind that question wording and practical difficulties in conducting surveys can introduce error or bias into the findings of opinion polls.

Country: **Britain**  
Sample design: Random Digit Dial (RDD) probability sample representative of all landline and cell phone-only households (roughly 98% of all British households)  
Mode: Telephone adults 18 plus  
Languages: English  
Fieldwork dates: March 19 – April 15, 2012  
Sample size: 1,018  
Margin of Error:  $\pm 3.3$  percentage points  
Representative: Landline and cell phone-only households (roughly 98% of all British households)

Country: **Czech Republic**  
Sample design: Random Digit Dial (RDD) sample representative of all adults who own a cell phone (roughly 91% of adults age 18 and older)  
Mode: Telephone adults 18 plus  
Languages: Czech  
Fieldwork dates: March 17 – April 2, 2012  
Sample size: 1,000  
Margin of Error:  $\pm 3.4$  percentage points  
Representative: Adults who own a cell phone (roughly 91% of adults age 18 and older)

**Country:** **France**  
**Sample design:** Random Digit Dial (RDD) sample representative of all landline and cell phone-only households (roughly 99% of all French households) with quotas for gender, age and occupation and proportional to region size and urban/rural population  
**Mode:** Telephone adults 18 plus  
**Languages:** French  
**Fieldwork dates:** March 20 – March 31, 2012  
**Sample size:** 1,004  
**Margin of Error:** ±3.5 percentage points  
**Representative:** Landline and cell phone-only households (roughly 99% of all French households)

**Country:** **Germany**  
**Sample design:** Random Last Two Digit Dial (RL(2)D) probability sample representative of all landline telephone households (roughly 91% of all German households) stratified by administrative districts proportional to population size and community size  
**Mode:** Telephone adults 18 plus  
**Languages:** German  
**Fieldwork dates:** March 19 – April 2, 2012  
**Sample size:** 1,000  
**Margin of Error:** ±4.0 percentage points  
**Representative:** Landline telephone households (excluding cell phone-only households [8%] and households without telephones [1%])

**Country:** **Greece**  
**Sample design:** Multi-stage cluster sample stratified by region and proportional to population size and urban/rural population excluding the islands in the Aegean and Ionian Seas (roughly 6% of the population)  
**Mode:** Face-to-face adults 18 plus  
**Languages:** Greek  
**Fieldwork dates:** March 20 – April 9, 2012  
**Sample size:** 1,000  
**Margin of Error:** ±3.7 percentage points  
**Representative:** Adult population (excluding the islands in the Aegean and Ionian Seas – roughly 6% of the population)

Country:	<b>Italy</b>
Sample design:	Multi-stage cluster sample stratified by four regions and proportional to population size and urban/rural population
Mode:	Face-to-face adults 18 plus
Languages:	Italian
Fieldwork dates:	March 19 – April 10, 2012
Sample size:	1,074
Margin of Error:	±4.4 percentage points
Representative:	Adult population
Country:	<b>Poland</b>
Sample design:	Multi-stage cluster sample stratified by Poland's 16 provinces and proportional to population size and urban/rural population
Mode:	Face-to-face adults 18 plus
Languages:	Polish
Fieldwork dates:	March 24 – April 16, 2012
Sample size:	1,001
Margin of Error:	±3.7 percentage points
Representative:	Adult population
Country:	<b>Spain</b>
Sample design:	Random Digit Dial (RDD) probability sample representative of landline and cell phone-only households (about 97% of Spanish households) stratified by region and proportional to population size
Mode:	Telephone adults 18 plus
Languages:	Spanish/Castilian
Fieldwork dates:	March 20 – April 2, 2012
Sample size:	1,000
Margin of Error:	±3.2 percentage points
Representative:	Landline and cell phone-only households (about 97% of Spanish households)

Country:	<b>United States</b>
Sample design:	Random Digit Dial (RDD) probability sample representative of all landline and cell phone-only households (about 98% of U.S. households) stratified by county
Mode:	Telephone adults 18 plus
Languages:	English, Spanish
Fieldwork dates:	March 20 – April 4, 2012
Sample size:	1,011
Margin of Error:	±3.5 percentage points
Representative:	Landline and cell phone-only households (about 98% of U.S. households)

**Pew Global Attitudes Project**  
**2012 Spring Survey Topline Results**  
**May 29, 2012 Release**

Methodological notes:

- Survey results are based on national samples. For further details on sample designs, see Survey Methods section.
- Due to rounding, percentages may not total 100%. The topline “total” columns show 100%, because they are based on unrounded numbers. When multiple responses are allowed, totals may add to more than 100%.
- Since 2007, the Global Attitudes Project has used an automated process to generate topline. As a result, numbers may differ slightly from those published prior to 2007.
- Not all questions included in the Spring 2012 survey are presented in this topline. Omitted questions have either been previously released or will be released in future reports.
