Summary

In 2025, military assistance to Ukraine has been evolving as the US, under the Trump administration, has adopted a different approach to the conflict and Europe has taken steps to assume greater responsibility for its security, including support for Ukraine. In April, European leaders said that [“Ukraine’s security is inseparable from Euro-Atlantic security”](#).

Military assistance to Ukraine during the tenure of the Biden administration is examined in Library research briefing, [Military assistance to Ukraine since the Russian invasion \(February 2022 to January 2025\)](#).

A different approach by the US

After taking office in January 2025, President Trump adopted a significantly different approach to Ukraine from his predecessor, President Biden.

The administration identified achieving a negotiated peace agreement as a priority. In keeping with that aim President Trump has not sought congressional approval for any new funding for US military assistance to Ukraine, although the [US has largely continued to deliver aid committed by the Biden administration](#). The US has also stepped back from leading the Ukraine Defence Contact Group, which has been coordinating military assistance to Ukraine since the onset of the conflict.

President Trump’s change of approach to Ukraine came at a time when the [US’s commitment to European security was also frequently being called into question](#), and the [US was seeking a rapprochement with Russia](#).

However, [President Trump has expressed increasing frustration with President Putin](#) over Ukraine and the slow progress made in peace talks.

A new plan for military aid

At the beginning of July 2025, the US administration confirmed that some [military aid to Ukraine was being suspended while the Department of Defense conducted a capability review](#). That aid was reported to include [Patriot air defence missiles and precision guided weapons](#), including artillery.

That decision was reported to have [surprised the White House and the US State Department](#), and just a few days later that assistance, at the direction of President Trump, resumed.

On 14 July 2025, the US administration also announced [a new package of military assistance to Ukraine](#). However, this does not mean a return to full and unconditional US military support for Ukraine. President Trump has been clear that the US will not pay for any of this new assistance. It will be funded by NATO allies, and some assets, including Patriot air defence systems, will be delivered to backfill European capabilities that will be sent to Ukraine in the first instance. The NATO Secretary General, Mark Rutte, has said that it is [“totally logical” for Europe to step up and fund US assistance](#).

Europe announces it will increase support

In contrast with the Trump administration, most European leaders (with the exception of Hungary) and the European Union have continued to express their [unwavering support for Ukraine](#) in the face of Russian aggression. The UK and the EU have also continued to adopt [sanctions against Russia](#).

The changing international security situation has also prompted European nations to [agree increases in defence spending](#), to start making [plans for European rearmament](#) and to find innovative ways to continue supporting Ukraine, including through creating new financing mechanisms and increasing support for Ukraine’s defence industry. President Trump’s commitment in mid-July to provide Ukraine with additional military assistance is, for example, being financed by NATO allies.

In 2025 the UK and Germany have assumed [leadership of the Ukraine Defence Contact Group](#). The UK and France are also leading proposals for a [‘coalition of the willing’](#), to support any potential peace agreement between Ukraine and Russia.

Bilateral military assistance continues

Supported by existing multinational initiatives such as the International Fund for Ukraine, and new measures within the G7 and EU, countries are increasingly moving away from direct bilateral donations of military equipment from national inventories to the financing of procurement to allow for direct acquisition from industry. Greater emphasis is also being given to initiatives aimed at the joint production of capabilities between Ukraine’s defence industry and the UK/European defence industrial base.

1 A different approach by the US

After taking office in January 2025, President Trump adopted a significantly different approach toward Ukraine from his predecessor, President Biden.

The administration identified achieving a negotiated peace agreement as a priority. In keeping with that aim President Trump has not sought congressional approval for any new funding for US military assistance to Ukraine, although the US has largely continued to deliver aid committed by the Biden administration.¹ The US has also stepped back from leading the Ukraine Defence Contact Group, which has been coordinating military assistance to Ukraine since the onset of the conflict.

President Trump's change of approach to Ukraine came at a time when the US's commitment to European security was also frequently being called into question, and the [US was seeking a rapprochement with Russia](#).² Both President Trump and President Putin have said they are keen to reset US–Russia relations and further economic cooperation.³

However, President Trump has also expressed increasing frustration with President Putin over Ukraine and the slow progress made in peace talks. Following a phone call between the two leaders on 3 July 2025, President Trump said that the talks made no progress towards a ceasefire and that he was “very disappointed”, saying “I don't think he [President Putin] is looking to stop [the conflict]”.⁴ According to a Kremlin read-out of the call, President Putin said Russia would not back down from its goals of eliminating the root causes of the conflict.⁵

1.1 Suspension of some US military aid – July 2025

At the beginning of July 2025, the US administration confirmed that some military aid to Ukraine was being suspended. This was while the Department of Defense conducts a capability review to ensure that the military aid it

¹ This is examined in detail in Library research briefing, [Military assistance to Ukraine since the Russian invasion \(February 2022 to January 2025\)](#)

² See for example, Chatham House, [“Trump's ‘electroshock’ on Ukraine ends the debate: Europe cannot rely on the US for its security”](#), 14 February 2025

³ President of Russia, [Telephone conversation with US President Donald Trump](#), 12 February 2025

⁴ CNN, [“Trump says he is very disappointed after call with Putin”](#), 4 July 2025

⁵ President of Russia, [Commentary by Aide to the President of Russia Yuri Ushakov](#), 3 July 2025

provides to other countries does not leave shortfalls in the US's own inventory. The review is in line with President Trump's 'America First' agenda.⁶

Pentagon spokesman Sean Parnell said that the capability review was being conducted to ensure "US military aid aligns with our defense priorities" and that the department will not be providing updates regarding "specific quantities or types of munitions being provided to Ukraine, or the timelines associated with these transfers".⁷ It has, however, been widely reported in the media that suspended aid includes Patriot air defence missiles and precision guided weapons, including artillery, and munitions used by F-16 fighter jets.⁸

Reaction to the suspension

The decision to suspend some US aid had been met with concern as Ukraine faces intensified Russian aerial attacks. At the end of June and beginning of July 2025, Russia conducted some of the largest drone and missile attacks on Ukraine since the start of the conflict in February 2022, increasingly targeting cities and towns in western Ukraine.⁹

Ukraine

On 2 July 2025, the Ukrainian Government said that it was trying to clarify the situation with the US and that it was important to "maintain stability, continuity and predictability in the provision of agreed upon defence assistance, primarily in the area of strengthening air defences".¹⁰ The Ukrainian Foreign Ministry said that any decision to suspend military aid would encourage Russia to continue its war, rather than seek peace".¹¹

Ukraine has previously expressed its willingness to purchase air defence systems and other munitions from the US to make up for any capability shortfall.¹²

Think tanks

An assessment by the Institute for the Study of War (ISW) agreed that the suspension of US aid will "likely accelerate Russian gains on the battlefield, as previous US aid suspensions have in the past" and will reinforce President Putin's view that Russia can outlast Western support for Ukraine. As a result,

⁶ Department of Defense, DoD News, "[DOD capability review to analyze where military aid goes, ensure America is first](#)", 2 July 2025

⁷ US Department of Defense, [Press briefing](#), 2 July 2025

⁸ ABC News, "[US freezes air defense and precision weapons shipment to Ukraine, White House says](#)", 2 July 2025; Financial Times, "[Ukraine summons top US diplomat after Washington halts some arms supplies](#)", 2 July 2025 and Politico, "[Pentagon halting some promised munitions for Ukraine](#)", 1 July 2025

⁹ Foreign, Commonwealth and Development Office, [UK statement to the OSCE](#), 3 July 2025; [UK statement to the OSCE](#), 16 July 2025 and Politico, "[As Trump admin bickers about arms halt, Russia hits Ukraine with missiles only Patriots can stop](#)", 9 July 2025

¹⁰ President of Ukraine, [Address by the President](#), 2 July 2025 and Ukrainska Pravda, "[Ukrainian Defence Ministry responds to halt in US military aid](#)", 2 July 2025

¹¹ Ministry of Foreign Affairs of Ukraine, [Statement](#), 2 July 2025

¹² Ukrainska Pravda, "[Ukraine presents US with list of weapons it's ready to buy](#)", 21 June 2025

the ISW concludes that the US decision will not compel President Putin to negotiate a peace agreement, which is President Trump's stated priority in Ukraine, but will "rather embolden Moscow to continue protracting Russia's war".¹³

The ISW also considers that, despite continued military aid to Ukraine by European and other allies, the US "remains the only Ukrainian partner that can provide certain critical weapons systems – especially air defenses – at scale and quickly".¹⁴

A previous assessment by the Center for Strategic and International Studies (CSIS) in May 2025 shared this view. In an evaluation of whether Ukraine could continue to fight without US aid, the CSIS concluded that European support could not fully replace US capabilities, particularly in air defence:

Ukraine currently relies heavily on U.S. systems, training, intelligence, and logistics, and although European support and Ukraine's own defense industry are substantial and growing, they cannot fully replace U.S. capabilities—particularly in the areas of air defense and intelligence assistance for precision targeting. The result is that continued U.S. aid remains extremely important for Ukraine's long-term effectiveness on the battlefield. The broader geopolitical implications of a U.S. withdrawal could embolden Russia and its allies while straining transatlantic unity.¹⁵

Russia

Kremlin spokesperson, Dmitry Peskov, welcomed the suspension of some US assistance, saying that "the fewer weapons are supplied to Ukraine, the sooner the special military operation ends".¹⁶

1.2

A new plan for US military aid

The Pentagon decision to suspend some military aid is reported to have taken the White House and the US State Department by surprise.¹⁷ Only a few days at the initial announcement, the Pentagon said that, at the direction of President Trump, military aid would resume, and additional air defence assets would be provided to Ukraine.

On 14 July, the US administration announced a new package of military assistance to Ukraine.¹⁸ However, the new assistance does not mean a return to full and unconditional US military support for Ukraine.¹⁹ President Trump

¹⁸ YouTube, [President Trump participates in a meeting with the NATO Secretary General](#), 14 July 2025

¹⁹ BBC News, ["Trump weapons pledge marks major step forward for Ukraine"](#), 14 July 2025

has been clear that the US will not pay for any of this new assistance, referring to the agreement as “business for us [the US]”.²⁰ It will be funded by NATO allies and some assets, including Patriot air defence systems, will be delivered to backfill European capabilities that will be sent to Ukraine in the first instance.

Additional air defence

Following the suspension of some US military aid, President Trump and President Zelenskyy discussed Ukraine’s air defence requirements during a phone call between on 4 July 2025. Ukrainian and US officials reportedly agreed to further discussions on “additional practical enhancements to air defense”, although no details were provided.²¹

On 7 July the Pentagon subsequently announced that, at the direction of President Trump, additional defensive weapons would be sent to Ukraine “to ensure the Ukrainians can defend themselves while we work to secure a lasting peace and ensure the killing stops”. The Pentagon statement confirmed that the capability review framework remains in effect but provided no further information.²² It was not clear, at the time, whether the decision to provide additional weapons amounted to a total resumption of the weapons deliveries that were suspended, including Patriot air defence missiles.

A significant new package of assistance

During a meeting with the NATO Secretary General Mark Rutte on 14 July 2025, President Trump announced that the US would provide Ukraine with a significant package of new military assistance.²³

Reflecting President Trump’s increasing frustration with President Putin, that announcement on assistance was combined with a US ultimatum for Russia to reach a peace agreement within 50 days or face 100% secondary tariffs.²⁴ Such tariffs are aimed at those countries or companies that continue to do business with Russia, in particular those purchasing Russian energy products.²⁵

Funded by NATO allies

“Trump appears to have guaranteed that the all-important US weapons pipeline to Ukraine will remain open for now – provided others pay for it”.

Paul Adams, BBC diplomatic correspondent, 14 July 2025

In contrast to previous US military assistance, however, none of the new aid will be funded by the United States.²⁶

Equipment, including air defence, precision guided missiles and munitions, will be manufactured and delivered by the United States but funded by NATO allies. President Trump has reportedly ruled out the provision of long-range missiles to Ukraine.²⁷

In some cases, that equipment will be used to backfill capabilities that, for the sake of speed, NATO allies have provided in the immediate to short term. It is expected Patriot defence systems held by several European allies will be delivered to Ukraine and then backfilled by the United States.

NATO, presumably through the NATO Security Assistance and Training (NSATU) command (see section 2.1 below) will coordinate the funding and delivery of equipment to Ukraine, in conjunction with the US Ambassador to NATO Matt Whittaker.²⁸ Equipment is expected to be sent in tranches and will be based on Ukraine’s requirements.

NATO Secretary General, Mark Rutte, said that for Europe to pay for US military assistance was “totally logical” and a good example of Europe “stepping up”.²⁹ Discussions on the implementation of the agreement are now underway.³⁰

In its daily assessment of the conflict, the Institute for the Study of War said that President Trump was “acting upon the reality” that bringing President Putin to the negotiating table would require using both economic measures and military support “to allow Ukraine to increase pressure on Russia on the battlefield”.³¹

²⁶ You Tube, [President Trump participates in a meeting with the NATO Secretary General](#), 14 July 2025

³¹ Institute for the Study of War, [Russian offensive campaign assessment](#), 14 July 2025

2 Europe's plans to step up

The Trump administration's approach to Ukraine and its increasing rapprochement with Russia has been in stark contrast to the approach of most European leaders (with the exception of Hungary) and the European Union who have continued to express their [unwavering support for Ukraine](#) in the face of Russian aggression. The UK and the EU have also continued to adopt [sanctions against Russia](#).

The changing security dynamic has also prompted European nations to [agree increases in defence spending](#), to start making plans for European rearmament and to find innovative ways to continue supporting Ukraine.

2.1 Leadership and coordination

Leadership of the Ukraine Defence Contact Group (UDCG)

The Ukraine Defense Contact Group (UDCG) has been the main forum through which countries supporting Ukraine have discussed and implemented the coordination of military assistance (See Library research briefing, [Military assistance to Ukraine \(February 2022 to January 2025\)](#)).

The group had been led by the US under the Biden administration, but the future of the group had been questioned with the election of President Trump. In January 2025 US officials said that it would be for the next administration to decide its policy on Ukraine but that the UDCG had been “built to adapt and built to last”.³² The UK, Poland, France, Germany and Italy (the Group of Five), expressed their support for its continuation as an “important forum for us to announce and deliver military equipment for Ukraine”.³³

In February 2025, the UK chaired a meeting of the UDCG for the first time. The US participated in the meeting, and in his opening remarks the new US Defense Secretary Pete Hegseth addressed speculation about future US leadership of the group by thanking the UK for “hosting and now leading the UDCG”.³⁴ He did not give any indication in those opening remarks of future US

³² US Department of Defense, [Press conference](#), 9 January 2025

³³ Ministry of Defence, [Joint Statement by Group of Five Defence Ministers](#), 13 January 2025

³⁴ US Department of Defense, [Opening remarks by Secretary of Defense Pete Hegseth at Ukraine Defense Contact Group](#), 12 February 2025

military assistance to Ukraine, arguing that European security must be the responsibility of European members of NATO and that “as part of this Europe must provide the overwhelming share of future lethal and nonlethal aid to Ukraine”.³⁵

Subsequent meetings of the UDCG at ministerial level, on 11 April and 4 June 2025, have been chaired by the UK and Germany.³⁶ A meeting of the UDCG National Armament Directors in April 2025 was also co-chaired by Ukraine, Germany and the UK.³⁷ Rotation between the Group of Five nations had previously been considered a possibility.³⁸

The US Defense Secretary, Pete Hegseth, attended the April meeting virtually and was represented at the June meeting by the US ambassador to NATO.³⁹

Long-term capability coalitions continue

Securing Ukraine’s long-term security has become an increasing focus of the UDCG. As a result, several ‘capability coalitions’ across the air, land and maritime domains have been established. They seek not only to address Ukraine’s immediate priorities, but also to provide Ukraine with coherent future capability and strengthen Ukraine’s defence industrial base.

Nine capability coalitions have been established so far, the most recent on electromagnetic warfare in April 2025. The purpose of each coalition is to “[create a greater and more coherent plan...which will further the options for future support and co-funding](#)”. They are overseen by the Capability Coalition Leadership Group (CCLG). On 9 January 2025, the [CCLG endorsed roadmaps](#) setting out the approach to be taken by each coalition through to 2027:

- F-16/air force coalition (led by US, Denmark and the Netherlands) – the coalition will [initially support Ukraine in creating a complete F-16 capability](#) through the training of pilots, the donation of aircraft and the provision of necessary infrastructure and maintenance within Ukraine. The longer-term objective is to build “a full-scale Ukrainian air force”.
 - Training on fourth generation aircraft, including the F-16, is being delivered collectively by a group of nations, including the UK, [which has been delivering basic flight training](#). Advanced flight training has been taking place in Denmark and the US and in November 2023, an F-16 European training hub was also opened in Romania.
 - Denmark, Belgium, the Netherlands and Norway have all committed to providing F-16 aircraft and [an initial operating capability was](#)

³⁵ US Department of Defense, [Opening remarks by Secretary of Defense Pete Hegseth at Ukraine Defense Contact Group](#), 12 February 2025

³⁹ US Department of Defense, [Press release](#), 11 April 2025 and Politico, [“Hegseth to skip Ukraine meeting at NATO headquarters”](#), 3 June 2025

[achieved in summer 2024](#). Concerns remain, however, over [the ability to maintain the F-16 in theatre](#).

- Ground-based air defence (France and Germany): – the intention is to create a NATO-compatible ground-based air defence system that will replace the ad-hoc systems that are currently in place across Ukraine. At the first meeting of the coalition in December 2023, [three working groups were established, focusing on command structure, systems and training](#).
- Artillery (France and the US) – the main focus of the coalition is the [provision of artillery and ammunition to Ukraine in the short term](#). In the longer term, the coalition aims to ensure the sustainability of Ukraine’s artillery capabilities and interoperability with allies.
- Maritime security (the UK and Norway) – [the coalition will develop Ukraine’s naval capabilities](#) and strengthen its ability to operate along its coastlines and into the Black Sea. It will include providing ships, vehicles, training and infrastructure.
- De-mining (Lithuania and Iceland) – the coalition aims to [coordinate existing and future demining assistance](#).
- Information security/IT (Estonia and Luxembourg) – the coalition will focus on [developing a secure and resilient IT infrastructure for Ukraine’s Ministry of Defence and its armed forces](#).
- Armoured vehicles and manoeuvrability (Poland, Germany and Italy) – [the coalition aims to strengthen Ukraine’s military vehicle fleet](#) and ensure maintenance and repair
- Drones (UK and Latvia) – [the coalition aims to provide Ukraine with thousands of drones](#) and components and to support innovation.
- Electromagnetic warfare (EW) (Germany, with support from Sweden) – [the coalition will coordinate the procurement of EW capabilities](#), training and the development of EW policies and doctrine. It was established in April 2025.

A role for NATO

NATO, as an alliance, has been clear in its political support of Ukraine and fully supports the provision of bilateral military assistance by individual allies to enable it to “uphold its right of self-defence”.⁴⁰ NATO has been helping to coordinate requests for assistance from the Ukrainian Government and is supporting the delivery of humanitarian and non-lethal aid.⁴¹

⁴⁰ NATO, [Relations with Ukraine](#) and [NATO’s response to Russia’s invasion of Ukraine](#) (accessed 29 June 2022)

⁴¹ NATO, [NATO’s response to Russia’s invasion of Ukraine](#) (accessed 29 June 2022)

However, Ukraine is not a NATO member and therefore isn't party to NATO's mutual defence clause under Article V of the North Atlantic Treaty. As such, NATO troops will not be deployed on the ground in Ukraine. Allies have also ruled out imposing a no-fly zone over Ukraine because it would risk bringing Russia into direct conflict with NATO forces.⁴²

Comprehensive Assistance Package

NATO military support prior to the Russian invasion of Ukraine was primarily provided through a [Comprehensive Assistance Package \(CAP\) that had been agreed in 2016](#).

Focused on capacity building and defence reform, the measures outlined in the CAP provide non-lethal assistance. The CAP was updated in 2022 to provide long-term, sustained support and to help Ukraine move away from Soviet-era equipment and bring Ukrainian forces and equipment up to NATO standards.

In April 2023, the NATO Secretary General said that the CAP would be developed into a new strategic multi-year assistance programme which would "assist Ukraine on its path to Euro-Atlantic integration".⁴³ That programme was agreed at the Vilnius Summit in July 2023.⁴⁴

Establishing NATO Security Assistance and Training for Ukraine (NSATU)

At the Washington Summit in July 2024, allies agreed to establish the NATO Security Assistance and Training for Ukraine (NSATU) Command.⁴⁵ That command, headed by [a three-star general](#), has been established in Germany along with several logistical nodes in eastern Europe. Approximately 700 NATO personnel are deployed as part of the new command.⁴⁶

Working alongside the UDCG, NSATU will coordinate the provision of military training and equipment by NATO allies and will provide logistical support. These roles were previously undertaken by the International Donor Coordination Centre (IDCC) in which the UK played a leading role.⁴⁷ In the longer term it will also support the transformation of Ukraine's defence forces and enable interoperability and further integration with NATO.⁴⁸ Specifically NSATU is expected to:

- Coordinate the training of Ukrainian personnel at facilities in NATO nations.

NSATU will not "under international law, make NATO a party to the conflict".

[Washington Declaration, July 2024](#)

⁴² NATO, [NATO's response to Russia's invasion of Ukraine](#) (accessed 29 June 2022)

⁴³ NATO, [NATO Foreign Ministers wrap up meetings with focus on China and support to Ukraine](#), 5 April 2023

⁴⁴ NATO, [Vilnius Summit Communiqué](#), 11 July 2023

⁴⁵ NATO, [Washington Declaration](#), 10 July 2024, para.15

⁴⁶ US Department of Defense, [Press briefing](#), 12 July 2024

⁴⁷ US Department of Defense, [Background briefing on Ukraine](#), 8 January 2025. The IDCC is examined in Library research briefing, [Military assistance to Ukraine \(February 2022 to January 2025\)](#)

⁴⁸ NATO, [Statement of the NATO-Ukraine Council](#), 11 July 2024, para.5

- Take responsibility for the planning and coordination of donations by allies.
- Manage the transfer and repair of equipment.
- Provide support to the long-term development of Ukraine's armed forces.⁴⁹

An NSATU trust fund has also been established to help meet Ukraine's urgent equipment and logistical support needs, including spare parts and fuel for vehicles, training and consumables to support troops on the frontline.⁵⁰

NSATU seems the most likely channel through which President Trump's recently announced military assistance to Ukraine will be coordinated. On 14 July, President Trump said that the US would manufacture and deliver capability to Ukraine, including air defence, but that NATO allies would fund that assistance (see section 1.2).

Pledge of long-term security assurance for Ukraine

At the 2024 summit, NATO allies also agreed a [Pledge of long-term security assurance for Ukraine](#). That pledge commits allies to provide a minimum of €40 billion for military assistance to Ukraine by the middle of 2025. That commitment extends to all costs related to the provision of military equipment, assistance (including non-lethal aid and investment in Ukraine's defence industry) and training, whether delivered through NATO, bilaterally, multilaterally or "by any other means".⁵¹

Allies will aim to meet this pledge through proportional contributions, according to their share of total gross domestic product (GDP) between NATO allies. They will report on their contributions in relation to this pledge twice a year and NATO leaders will re-evaluate allied contributions at future NATO summits, starting in 2025.⁵²

At the NATO summit in the Hague in June 2025, allies reaffirmed their "enduring sovereign commitments to provide support to Ukraine".⁵³ In remarks to the NATO Public Forum on 24 June, the NATO Secretary General Mark Rutte said that 35 billion (without specifying US dollars or euros) in military support to Ukraine had been pledged by Canada and European NATO

⁴⁹ US Department of Defense, "[US will continue to lead support of Ukraine through Contact Group](#)", DoD News, 9 July 2024

⁵⁰ Ministry of Defence, [Press release](#), 4 June 2025

⁵¹ Specifically, those costs include the purchase of military equipment for Ukraine; in-kind support donated to Ukraine; costs related to maintenance, logistics and transportation of military equipment for Ukraine; costs for military training; operational costs associated with provision of military support; investments in and support for Ukraine's defence infrastructure and defence industry; all contributions to NATO Trust Funds for Ukraine, including non-lethal aid (NATO, [Pledge of Long-Term Security Assistance for Ukraine](#), July 2024)

⁵² NATO, [Pledge of Long-Term Security Assistance for Ukraine](#), July 2024

⁵³ NATO, [The Hague Summit Declaration](#), 25 June 2025

allies in the first half of 2025 and that there had been a shift in burden sharing on Ukraine:

at this moment, the Europeans and the Canadians have pledged for this year, 35 billion in military support to Ukraine. Last year, it was just over 50 billion for the full year [...] that means that the support for Ukraine is still at a level even higher than it was last year. And we also see a shift of the burden from the US more to the Canadians and Europeans, which I think is fair, that we take a bigger share of this burden as Europeans and Canadians from the United States.⁵⁴

International Fund for Ukraine

In April 2022 several allies, led by the UK, established an [International Fund for Ukraine \(IFU\)](#) to coordinate the purchase and transport of military equipment to Ukraine from third countries and/or industry.⁵⁵ The IFU was later expanded to finance the rapid purchase of military equipment for Ukraine, to support Ukraine in the procurement process and to facilitate training. The longer-term intention is to help Ukraine purchase equipment directly from the defence industry, rather than relying on other countries' donations from their own stockpiles.⁵⁶

To date, over £1.5 billion has been contributed to the IFU by the UK, Sweden, Norway, Netherlands, Denmark, Lithuania, Iceland, Australia, New Zealand Germany, Portugal and Canada.⁵⁷

The IFU is financing the urgent procurement of capabilities including artillery ammunition, drones, air defence, maritime capabilities, intelligence, surveillance and reconnaissance systems, electronic warfare systems, manoeuvre support, combat vehicles spares and mine clearance equipment.⁵⁸

Using profits from sanctioned Russian assets

In 2024, separate proposals were agreed by G7 countries and EU member states to use the profits from sanctioned Russian assets, held in their respective jurisdictions, to help finance military assistance to Ukraine.

EU 'windfall profits' agreement

On 21 May 2024 the EU approved the use of net windfall profits generated from sanctioned Russian state assets held within the EU (estimated to be worth approximately €2.5 billion per year) to be used to support Ukraine's self-defence and reconstruction. 90% of that funding will be channelled through the Ukraine Fund within the European Peace Facility for military assistance. Part of the funds will be used by the EU member states to procure

⁵⁴ NATO, [Remarks by NATO Secretary General Mark Rutte at the NATO Public Forum](#), 24 June 2025

capabilities for the Ukrainian armed forces. The remaining funds will be used to procure capabilities directly from the Ukrainian defence industry. The remaining 10% will support EU humanitarian and reconstruction assistance programmes.⁵⁹

At the time of writing, €3.6 billion has been made available under the mechanism so far (€1.4 billion in July 2024 and €2.1 billion in April 2025).⁶⁰ Within the second tranche of funding, €1 billion has been earmarked for direct procurement for the Ukrainian defence industry.⁶¹

G7 loan agreement

In June 2024 G7 countries and EU also agreed to extend \$50 billion of loans to Ukraine that will be “serviced and repaid” by future profits generated by immobilised Russian assets in the EU and the jurisdictions of the other non-EU G7 countries. Part of these loans will be used for military assistance, disbursed “through multiple channels that direct funds to Ukraine’s military”. Funds will also be used for Ukraine’s economic and reconstruction needs.⁶²

The details of those loans were agreed in October 2024 and funds will be made available from the end of 2024 until December 2027.⁶³

UK–French leadership on a potential ‘coalition of the willing’

“Any deal must be backed by strength”.

Prime Minister Keir Starmer, 2 March 2025

Several countries, led by the UK and France, have been working to develop a ‘coalition of the willing’ to defend any peace deal that is eventually agreed in Ukraine.⁶⁴ Many, including the UK Prime Minister, believe that Russia would violate a peace deal “without anything behind it” and that “the time for planning is now”.⁶⁵

At a meeting of international leaders on 2 March 2025, Prime Minister Keir Starmer acknowledged that “not every nation will feel able to contribute”, but that planning among countries willing to contribute to some form of peacekeeping or reassurance force would now begin with a sense of “real urgency”. At that initial meeting, he made specific commitments to back up that force by deploying, if necessary, UK “boots on the ground, and planes in

⁶⁴ Prime Minister’s Office, [PM remarks at international leaders’ summit press conference](#), 2 March 2025 and [HC Deb 3 March 2025](#), c25

⁶⁵ Prime Minister’s Office, [Press release](#), 20 March 2025

the air”. He also made clear that “to succeed, this effort must have strong US backing”.⁶⁶ France also committed to deploying forces.⁶⁷

Further detailed planning sessions, at both the ministerial and military level, have taken place over the last few months.⁶⁸

Few details have emerged of what a coalition may eventually look like. In April 2025, a UK Government spokesperson was reported in the Independent newspaper as saying that “advanced coalition of the willing planning is developing at pace” and “all options remain on the table”.⁶⁹ The government has previously said that “it is important to maintain discretion when commenting on the specific details of these discussions, until the conditions of the necessary ceasefire are clear”.⁷⁰

There has, however, been widespread speculation that plans are being scaled back with a view to deploying military trainers on the ground in Ukraine, as opposed to a fully-fledged ‘reassurance force’.⁷¹

Following the latest meeting of the coalition on 10 July, the UK, France and Ukraine said that “mature operational plans to deploy a reassurance force – the ‘multinational Force Ukraine’ had been developed and they welcomed further moves to establish a “UK/French led operational headquarters to support planning activity” and “Ukraine’s readiness to issue an invitation to the force and enter into formal agreements with participating countries where necessary”.⁷²

US will not provide security guarantees

The US has said that it will not deploy troops to Ukraine as part of any security guarantee.⁷³

In an interview with Tucker Carlson on 22 March 2025, US Special Envoy, Steve Witkoff, called efforts to establish a coalition of the willing “a posture and a pose” and criticised European leaders for being simplistic and thinking “we all have got to be like Winston Churchill”. He described the idea of President Putin “marching across Europe” as “preposterous”.⁷⁴

Russian opposition

Russia has also rejected the deployment of European peacekeepers in Ukraine to monitor and enforce any peace agreement.⁷⁵ In response, both President Macron and Prime Minister Starmer have said that the deployment of allied forces in Ukrainian territory was “not up to Russia to accept or not”.⁷⁶

2.2 EU support for Ukraine

In June 2024, the EU and Ukraine signed an [agreement on long-term security cooperation](#) (PDF).⁷⁷ The agreement envisages EU support to Ukraine “for as long as it takes and as intensely as needed”. In addition to the long-term provision of military equipment and training, the agreement also commits to strengthening Ukraine’s domestic defence industry so that it may achieve greater self-sufficiency.

European peace facility continues

Much of the military assistance to Ukraine has been provided bilaterally between individual EU member states and Ukraine (see section 3).

However, the EU has also been providing military equipment and training through its [European Peace Facility](#) (EPF). This is the first time the bloc has, in its history, approved the supply of lethal weapons to a third country using EU money.

To date, the EU has committed €11.1 billion of EPF funding for military support to Ukraine, including €5 billion for a dedicated Ukraine Assistance Fund which was agreed in March 2024:

- Seven individual tranches of military assistance (approximately €500 million each).
- The establishment of a €5 billion Ukraine Assistance Fund.
- Two industry assistance measures (collectively worth €2 billion) for the joint procurement of ammunition and missiles.

⁷⁵ Ministry of Foreign Affairs of the Russian Federation, [Foreign Minister’s statement](#), 18 February 2025 and Ministry of Foreign Affairs of the Russian Federation, [Foreign Minister Sergey Lavrov’s written interview with Brazilian newspaper O Globo](#), 28 April 2025

⁷⁷ The agreement is examined in greater detail in Library research briefing: [Security guarantees to Ukraine](#)

- Financial support for the EU Military Assistance Mission in Ukraine (€362 million).⁷⁸

Combined with the bilateral military assistance being provided by EU member states, overall EU support to Ukraine is estimated, at the time of writing, at €59.6 billion.⁷⁹

EU training mission for Ukraine

In November 2022, the EU launched a [military training mission to Ukraine](#) (EUMAM Ukraine) that would complement existing bilateral and multilateral training efforts.⁸⁰ Initially mandated for two years, it aimed to provide specialised training to 30,000 Ukrainian armed forces personnel, at various locations across the EU. The mission is open to participation by third states.⁸¹ As of November 2024, financial support for EUMAM Ukraine totalled €382 million.

The mission's mandate has subsequently been extended for a further two years, until 15 November 2026 and with an allocated budget of €409 million.⁸²

77,000 Ukrainian personnel have been trained under the programme so far.⁸³

EU White Paper on Defence Readiness and an EU rearmament plan – March 2025

In response to the shift in US policy on Ukraine under President Trump, the US's increasing rapprochement with Russia and concerns over the US's commitment to European security, the EU has begun making plans for European rearmament.

In March 2025, the European Commission and the EU High Representative, Kaja Kallas, presented a [White Paper for European Defence Readiness 2030](#) (PDF), along with a specific plan for financing European rearmament ([ReArm Europe Plan](#) (PDF)), which envisages unlocking more than €800 billion in defence investment over the next few years.

While setting out a framework for EU member states to achieve greater strategic autonomy in European defence and security, both documents acknowledge that “the future of Ukraine is fundamental to the future of

⁷⁸ Council of the European Union, [EU solidarity with Ukraine](#) (accessed 10 July 2025)

⁷⁹ As above

⁸⁰ EU External Action Service, [Informal meeting of EU Defence Ministers: Press remarks by EU High Representative](#), 30 August 2022

⁸² Council of the European Union, [Press release](#), 8 November 2024

⁸³ Council of the European Union, [EU solidarity with Ukraine](#) (accessed 10 July 2025)

Europe as a whole”, and that in the short term, “support for Ukraine is the immediate and most pressing task”.⁸⁴

Support to the Ukraine defence industry

The white paper supports the integration of the Ukrainian defence industry into the European defence technological and industrial base (EDTIB) as part of Ukraine’s accession to the EU.

It argues that the most effective and cost-efficient means of supporting Ukraine is through direct support to its domestic defence industry, most notably through directly procuring capabilities from it; this would be financed by EU member states which would then donate capabilities to the Ukrainian armed forces. The white paper highlights the G7 loan agreement and the Ukraine Assistance Fund (see above) as the primary means of financing such support.

The Ukrainian defence industry will also be able to access a new EU financing instrument, [Security Action for Europe \(SAFE\)](#) (PDF), which has been established under the rearmament plan. Through this initiative, the European Commission will borrow up to €150 billion on capital markets, which will be distributed to EU and other participating states in the form of long-term loans to rapidly increase investments in critical defence capabilities through joint procurement from the European defence industry.

A cross-cutting EU–Ukraine taskforce has also been established to reinforce existing cooperation with the Ukraine Defence Contact Group and NATO Security Assistance and Training for Ukraine, and to enhance “industrial cooperation between EDTIB and the Ukrainian defence industry”.⁸⁵ The taskforce will focus on delivering potential flagship projects between the EU and Ukrainian defence industries, some of which have been identified through the existing EU–Ukraine Defence Industry Forum.⁸⁶

⁸⁴ European Commission/ EU High Representative, [Joint White Paper for European Defence Readiness 2030](#) (PDF), 19 March 2025

⁸⁵ European Commission/ EU High Representative, [Joint White Paper for European Defence Readiness 2030](#) (PDF), 19 March 2025

⁸⁶ European Commission, [Press release](#), 13 May 2025. The EU-Ukraine Defence Industry Forum was established in late 2023 as part of a series of international defence industry events initiated by the Ukrainian government. A similar forum for cooperation was established with the UK at the same time ([Taskforce Hirst](#)). The aim of the forum is to strengthen cooperation between the EU and Ukrainian defence industry, identify potential capability projects and encourage joint procurement.

3 Bilateral military assistance to Ukraine continues

Direct military assistance to Ukraine has been largely bilateral: donated directly from each country to Ukraine.

Bilateral military assistance continues, although it is evolving. Supported by existing multinational initiatives and measures within the G7 and EU (see above, section 2), countries are increasingly moving away from direct donations of military equipment from national inventories to the financing of procurement to allow for acquisition direct from industry. Greater emphasis is also being given to initiatives aimed at the joint production of capabilities between Ukraine's defence industry and the UK/European defence industrial base.

The following section gives headline information on support from each country and sources for further information, where available. It updates the information on bilateral assistance available in sections 3.4 and 3.5 of Library research briefing, [Military assistance to Ukraine since the Russian invasion \(February 2022 to January 2025\)](#).

This paper does not attempt to rank countries in terms of the military assistance they are providing to Ukraine or to make comparisons between individual countries and/or the US and Europe. Comparative data on the level of assistance being provided to Ukraine is available from organisations such as the Kiel Institute through its [Ukraine Support Tracker](#).

3.1 Headline support from the UK

The UK has been one of the leading donors to Ukraine, alongside the US and Germany.

To date, the UK has pledged [£18.3 billion in support to Ukraine](#) since February 2022. Of that funding, total military financing stands at £13.06 billion. £10.8 billion is for [military assistance that has been gifted](#) (including £3 billion in 2025/26), and the remainder is a £2.26 million loan announced in October 2024 as part of [the G7 Extraordinary Revenue Loans agreement \(ERA\)](#) (PDF). The loan is additional one-off financing that will be paid back from the proceeds of frozen Russian state assets.

The UK has provided both lethal and non-lethal weaponry and equipment, including tanks, air defence systems, artillery, and long-range precision

strike missiles. While the UK has committed to training Ukrainian fast jet pilots, combat fighter aircraft will not be provided.

In February 2025 the UK chaired [the Ukraine Defence Contact Group](#) for the first time after the US said it was stepping back (see section 1). It has continued leadership of the group alongside Germany.

The UK is also hosting a training programme ([Operation Interflex](#)), which is supported by thirteen international partners.

On 12 January 2024, the UK was the first country to announce a [ten-year year security cooperation agreement with Ukraine](#) (PDF). In January 2025 the UK and Ukraine also agreed [a 100-year partnership agreement](#).

Headline support from allies

NATO countries

Albania

The Albanian Government has confirmed its support for Ukraine but does not provide details of the military assistance that it provides.⁸⁷

Belgium

As of March 2025, Belgian military assistance stands at €1.27 billion.⁸⁸

It has provided both lethal and non-lethal weaponry including anti-tank weapons, machine guns, ammunition, armoured vehicles and air defence missiles.⁸⁹ Belgium has also channelled non-lethal military assistance through NATO's Comprehensive Assistance Package and contributes to the EU training mission for Ukraine (see section 2 above).⁹⁰

Bulgaria

The Bulgarian Government has provided widespread support to Ukrainian refugees, supplied humanitarian aid and supported Western-led sanctions against Russia.⁹³ Military support, however, has been complicated by the differing positions of the Bulgarian Government, Parliament and the President, Rumen Radev, who is widely opposed to the provision of lethal weaponry.

Details of the military assistance provided has remained classified but is widely thought to be old Soviet equipment that is being provided in exchange for modernisation assistance from NATO allies.⁹⁴

In September 2024, Bulgarian Defence Minister, Atanas Zapryanov, said that only the surplus property of the Bulgarian armed forces is supplied to Ukraine and that “we are helping a victim of aggression”.⁹⁵ Bulgaria has also joined the F-16 coalition.⁹⁶

Negotiations on long-term security guarantees between Bulgaria and Ukraine were launched at the end of October 2024.⁹⁷

Canada

Canada has been providing bilateral non-lethal military assistance to Ukraine for several years and between 2015 and 2022 had a training and capacity building mission in Ukraine ([Operation Unifier](#)). Since February 2022 Canada has been providing Ukraine with lethal weaponry, including tanks, air defence systems and artillery.⁹⁸

To date, Canada has committed \$6.5 billion in military assistance which will allow for the provision of military assistance to Ukraine “through to 2029”.⁹⁹

Canada is engaged in several multinational initiatives to urgently procure key capabilities and participates in several UDCG capability coalitions (see above), including armour, drones, IT and the air force coalition.

Canada has extended Operation Unifier to March 2026.¹⁰⁰ Personnel are deployed with the UK-led training programme Operation Interflex, and in Poland and Latvia to provide engineering, medical and junior officer training.¹⁰¹

An [agreement on long term security cooperation between Canada and Ukraine](#) was signed on 24 February 2024.

Czech Republic

As of July 2024, military assistance to Ukraine is valued at approximately €400 million.¹⁰⁵

The Czech Republic provides both lethal and non-lethal military assistance to Ukraine and has taken a leading role in establishing partnering arrangements with other countries to jointly finance projects and/or enable the purchase of equipment from Czech industry. In 2024, the Czech Government launched an initiative to provide Ukraine with hundreds of thousands of artillery shells sourced from suppliers outside of the EU and US.¹⁰⁶ That initiative was joined by 18 countries who have jointly financed the project.¹⁰⁷ Funding has been secured until the autumn of 2025.¹⁰⁸

In the longer term, the Czech Republic is also supporting the F-16 air force coalition and the drone coalition (see section 2.1 above).

In July 2024, the Czech Republic and Ukraine [concluded a bilateral agreement at the meeting of the European Political Community](#) in London.

Denmark

As of 17 June 2025, military support for Ukraine since February 2022 stands at €9 billion.¹⁰⁹

In March 2023, the Danish Government established the Danish National Ukraine Fund which will support military and civilian assistance to Ukraine through to 2028. After an uplift in funding in April 2024, €8.1 billion of that fund was earmarked for military assistance, including weapons and training.¹¹⁰ €6.7 billion of that fund had been committed by the end of November 2024.¹¹¹ Denmark also contributes to the International Fund for Ukraine.¹¹²

Denmark has provided both lethal and non-lethal military equipment, including anti-tank weapons, maritime capabilities, its entire inventory of artillery, BMP-2 and modernised T-72 tanks and associated munitions, and air defence missiles. It has established several joint procurement projects and taken a lead in financing weapons procurement, both from third countries, including the Czech ammunition initiative, and direct from the Ukrainian defence industry.¹¹³ In September 2024, the Danish Ministry of Defence confirmed that it would manage €394.6 million of funding received under the EU's frozen assets windfall mechanism (see section 2) to aid Ukraine's defence industry.¹¹⁴

Denmark was also the first country to donate F-16 aircraft to Ukraine and jointly leads, alongside the US and the Netherlands, the F-16 air force capability coalition (see section 2.1).¹¹⁵ Denmark is also a member of the IT, drone, artillery, air defence, maritime and demining capability coalitions.¹¹⁶

Denmark provides training to Ukrainian military personnel through the UK-led Operation Interflex and the EU training mission ([EUMAM Ukraine](#)).

On 23 February 2024, Denmark became one of the first non-G7 countries to sign [a 10-year security cooperation agreement](#) (PDF) with Ukraine.¹¹⁷

Estonia

Estonia was one of the first countries to provide Ukraine with lethal military assistance as Russia built up its forces on Ukraine's borders.¹¹⁸

Total military aid stands at approximately €500 million.¹¹⁹ In January 2024, the Estonian President, Alar Karis, pledged to allocate a further €1.2 billion for Ukrainian military assistance to 2027.¹²⁰ Military aid to Ukraine accounts for more than 1.4% of Estonia's gross domestic product (GDP).¹²¹

Estonia is leading the long-term capability coalition on information security, in conjunction with Luxembourg and joined the drone capability coalition in February 2024.¹²²

Estonia and Ukraine concluded a long security cooperation agreement in June 2024.¹²³

¹²³ President of Ukraine, [Agreement on security cooperation and long term support between Ukraine and Estonia](#), 27 June 2024

Military assistance, to date, totals approximately €2.6 billion.¹²⁴ Initially focused on non-lethal equipment such as protective gear and medical supplies, Finnish support has evolved to the provision of lethal aid. Details have largely been withheld for security reasons. In May 2025, the Finnish Ministry of Defence confirmed that it had reached an agreement with the EU Commission to procure ammunition from Finnish suppliers, using the profits from frozen Russian assets.¹²⁵

Finland also contributes to the training programme for Ukrainian personnel that is being hosted by the UK (Operation Interflex).¹²⁶

Finland and Ukraine concluded a bilateral security cooperation agreement on 3 April 2024.¹²⁷

ground.¹³⁰ France has also supplied Ukraine with an unspecified number of Mirage-2000 fighter jets, which will operate alongside the F-16 coalition fleet.¹³¹ Questions have been raised by analysts, however, over the long-term ability of Ukraine to operate and maintain a fighter jet fleet with more than one aircraft variant.¹³²

Since early 2023, France has also financed Ukraine's procurement of equipment directly from French industry and established agreements for the joint production of spare parts and maintenance of equipment.¹³³ In September 2024 the French Ministry of Defence confirmed that €300 million raised from the profits of immobilised Russian assets would be used to urgently procure ammunition, artillery and air defence capabilities from the French defence industry.¹³⁴ France has also given financial support to the Czech ammunition initiative.¹³⁵

French personnel are contributing to the UK training programme for Ukrainian marines.¹³⁶ It is also jointly leading the capability coalitions that have been established on ground-based air defence and artillery, in conjunction with Germany and the US respectively.

France and Ukraine signed a [10-year security cooperation agreement](#) in February 2024.

Figures for French assistance to Ukraine are not routinely published. In early 2024, published figures said French military assistance had amounted to €3.9 billion in 2022 and 2023, and a further €3 billion had been earmarked for 2024.¹³⁷ At the end of October 2024, however, Armed Forces Minister Sébastien Lecornu said that French military assistance in 2024 would not reach €3 billion, as initially planned but would be more in the region of €2 billion.¹³⁸ A further €2 billion has been committed for 2025, amounting to an estimated €7.9 billion in total, according to government statements.¹³⁹

Germany

After initial reluctance to provide Ukraine with lethal military assistance, amid concerns that it would provoke Russia and hamper the diplomatic process, Germany has become one of the largest donors of lethal military aid to Ukraine.¹⁴⁰ That assistance has continued under the government of Chancellor Friedrich Merz, which took office in May 2025.¹⁴¹

At the time of writing, €38 billion in military assistance has either been spent since February 2022 or has been committed to support Ukraine over the next few years.¹⁴²

Among other things, Germany has provided anti-tank weapons, air defence systems including Patriots, infantry fighting vehicles, main battle tanks, artillery, drones and ammunition.

In 2024, the German government launched an air defence initiative to urgently “find or finance” more air defence systems for Ukraine.¹⁴³ More than \$1 billion in financial support had reportedly been pledged to the initiative by mid-2024.¹⁴⁴ Germany has reportedly been in discussions with the US Department of Defense over the purchase of two Patriot air defence systems, which may now form part of the new US military assistance to Ukraine that was announced on 14 July 2025.¹⁴⁵

Germany is also leading the long-term capability coalitions on ground-based air defence (jointly with France) and armour and has joined the drone capability coalition.¹⁴⁶ In January 2025, Germany committed funding, for the first time, to the International Fund for Ukraine, specifically in relation to the provision of maritime training.

¹⁴⁰ BBC News, [“Why Germany isn’t sending weapons to Ukraine”](#), 29 January 2022 and Deutsche Welle, [“Why Germany refuses weapons deliveries to Ukraine”](#), 19 January 2022.)

¹⁴⁵ Politico, [“Germany in talks with the US to buy Patriot systems for Ukraine”](#), 4 July 2025

¹⁴⁶ Latvian Ministry of Defence, [Latvia’s support to Ukraine](#) (accessed 21 February 2024)

The government continues to rule out the provision of Taurus long-range missiles.¹⁴⁷ In May 2025, however, Chancellor Merz said that Germany would finance the production of long-range weapons in Ukraine.¹⁴⁸

The German government has also been working with allies in eastern and southern Europe to facilitate the delivery of their Soviet-era equipment to Ukraine, in exchange for German equipment and has joined the Czech ammunition initiative.¹⁴⁹

[A 10-year agreement](#) on security assurances was signed with Ukraine on 16 February 2024.

Greece

Greece has said it will support Ukraine “for as long as it takes”, and has provided lethal weaponry, including Soviet-era infantry fighting vehicles and other weaponry such as air defence missiles, no longer in use by the Greek armed forces.¹⁵⁰ The Greek Government has previously ruled out the provision of Patriot air defence systems to Ukraine, saying that “these systems are critical to our deterrent capability”.¹⁵¹

Greece has given the US priority access to the Port of Alexandroupolis to facilitate the US’s provision of military assistance to Ukraine,¹⁵² and has joined the F-16 capability coalition.¹⁵³

As of July 2024, Greek military assistance to Ukraine has been estimated at €300 million.¹⁵⁴

In October 2024, Greece and Ukraine signed an agreement on long term security cooperation.¹⁵⁵

Hungary

Hungary does not support the provision of weaponry to Ukraine and does not allow lethal weapons bound for Ukraine to transit its territory.¹⁵⁶

Hungarian Prime Minister, Viktor Orbán, continues to block further tranches of military assistance to Ukraine under the EU's European Peace Facility.¹⁵⁷ The EU has, however, reached a deal (without Hungary) for military support using the profits of immobilised Russian assets (see section 2).

In mid-June 2024 Mr Orbán also dropped his opposition to Mark Rutte's appointment as NATO Secretary General, reportedly in exchange for promises that Hungary would be able to opt out of future NATO military support for Ukraine.¹⁵⁸

Iceland

Iceland does not have its own armed forces and therefore is not in a position to donate military equipment. It has, however, been helping deliver equipment to Ukraine from other allies, and it has provided field hospitals, winter clothing and medical supplies as well as combat medical training (with the UK and the Netherlands) and explosive ordnance disposal training (with Lithuania and the Nordic countries).¹⁵⁹ Iceland is leading the demining capability coalition, alongside Lithuania, and has joined the IT coalition.¹⁶⁰

Iceland also contributes financially to the NATO Security Assistance and Training for Ukraine, NATO's Comprehensive Assistance Package, the International Fund for Ukraine and the Czech ammunition initiative.¹⁶¹

- Government of Iceland, [War in Ukraine – Iceland's response](#)

Italy

Successive Italian governments have expressed their long-term support for Ukraine, providing a range of lethal and non-lethal weaponry, including armoured vehicles, artillery and air defence systems.¹⁶⁵ In 2024, Italy joined the IT capability coalition.¹⁶⁶

The Italian Government has not provided an economic value for its military assistance to Ukraine, but it is estimated by analysts to be in the region of \$1 billion to \$2 billion by mid-2024.¹⁶⁷ A further \$1.5 billion has reportedly been agreed for 2025.¹⁶⁸

Italy, as a member of the G7, has committed to provide Ukraine with long term security guarantees and signed [a 10-year security cooperation agreement with Ukraine](#) (PDF) on 24 February 2024.

Latvia

Latvia began providing lethal weapons in January 2022, prior to the Russian invasion of Ukraine.¹⁶⁹ That assistance has included, among other things, air defence missiles, unmanned aerial vehicles, artillery, helicopters and ammunition.¹⁷⁰

Latvia is leading the drone coalition, in partnership with the UK. In early 2024, Latvia also joined the IT coalition.¹⁷¹

The Ministry of Defence has also been working in partnership with the NGO, Entrepreneurs for Peace, to provide Ukraine with further non-lethal assistance.¹⁷²

As of January 2025, military assistance was an estimated €540 million.¹⁷³ At least €20 million has been provided in support of the drone capability coalition.¹⁷⁴ A further €20 million in military support has come from private donations.¹⁷⁵

The Ministry of Defence has said that the focus for 2025 will comprise procurement from Latvian industry, a €20 million contribution to the drone capability coalition, training of Ukrainian soldiers and support to Ukraine from other government ministries.¹⁷⁶

Latvia and Ukraine concluded [a bilateral agreement on security cooperation and long-term support](#) on 11 April 2024.

Capabilities include missiles, anti-tank weapons, armoured vehicles, drones, maritime surveillance radar, attack helicopters and air defence systems.¹⁷⁸

Lithuania is leading the demining capability coalition, alongside Iceland, and most of the €200 million earmarked for Ukrainian assistance to 2026, will support this coalition.¹⁷⁹ Lithuania has also provided financing for the Czech ammunition initiative, the German air defence initiative and the International Fund for Ukraine.¹⁸⁰ Lithuania has also joined the drone and IT capability coalitions.

Since the end of 2024 Lithuania has also been increasing its support to Ukraine's defence industry, particularly the domestic manufacture of long-range drones.¹⁸¹ In 2025, expanding defence production cooperation with Ukraine has been identified as a "key priority".¹⁸²

Lithuania has also been providing training to Ukrainian military instructors in anti-tank weaponry and is participating in the UK's Operation Interflex.

As of February 2025, total Lithuanian military assistance to Ukraine was approximately €769 million and is expected to reach €1 billion by the end of 2025.¹⁸³

Ukraine and Lithuania concluded an [agreement on long term security cooperation](#) in June 2024.

Luxembourg

To date, Luxembourg has provided Ukraine with €259 million in military assistance. Assistance in 2025 has been set at €120 million.¹⁸⁴

Assistance has included ammunition, artillery, anti-tank missiles, Humvee light vehicles, drones and non-lethal protective equipment.¹⁸⁵

In conjunction with Belgium and the Netherlands, Luxembourg has been financing the procurement of additional drones for Ukraine.¹⁸⁶ The focus for 2025 will be on supporting Ukrainian domestic defence production, including drones, surveillance and electronic warfare systems.¹⁸⁷

Luxembourg has joined the F-16 air force training coalition, the artillery coalition, the drone coalition and is jointly leading the IT coalition on with Estonia.¹⁸⁸ It also supports Ukraine through NATO's Comprehensive Assistance package.

Luxembourg and Ukraine concluded an agreement on long term security cooperation in July 2024.¹⁸⁹

Montenegro

Since March 2022, Montenegro has donated both non-lethal and lethal military equipment to Ukraine, primarily mortars, anti-aircraft missiles and ammunition.¹⁹⁰

Along with humanitarian aid, in February 2025 that assistance was estimated at over €10 million.¹⁹¹

In June 2025, Montenegro's Parliament approved participation in the EU military training mission for Ukraine.¹⁹² Montenegro also contributes to NATO's Comprehensive Assistance Package for Ukraine and has signed the G7 Joint Declaration setting out long term security guarantees to Ukraine.¹⁹³ Negotiations on an agreement began in August 2024.¹⁹⁴

Netherlands

To the end of 2024, the Netherlands has provided €4.6 billion in military aid to Ukraine, including financial contributions to the International Fund for Ukraine and the NATO Comprehensive Assistance Package.¹⁹⁵ The government

¹⁹⁵ Government of the Netherlands, [Dutch aid for Ukraine](#) (accessed 9 July 2025)

has said that a further €9 billion in military assistance has also been committed.¹⁹⁶

Dutch assistance to Ukraine began just prior to the Russian invasion of Ukraine in 2022 as Russian military forces built up on Ukraine's borders.¹⁹⁷ Further tranches of assistance have included anti-aircraft missiles, ammunition, Patriot air defence systems, anti-tank weapons, artillery, armoured vehicles, two minehunter vessels, and F-16 aircraft.¹⁹⁸ The Netherlands has also partnered the US, Germany, Czech Republic and Denmark to provide refurbished main battle tanks.¹⁹⁹

The Netherlands has also financed several procurement initiatives, including the Czech ammunition project and the German-led initiative on air defence, and has entered into agreements with the Czech defence industry to purchase artillery.²⁰⁰

The Netherlands is jointly leading the F-16 coalition and has provided 24 F-16 aircraft to Ukraine, the last of which was delivered in May 2025. A package of support, including training, spare parts, ammunition and fuel, will continue.²⁰¹ The Netherlands has also joined the IT and drone capability coalitions.²⁰²

The Netherlands participates in the UK-led training programme for Ukrainian personnel and is working, in conjunction with the UK and Iceland on the delivery of combat medical training to Ukrainian personnel.²⁰³

In February 2024, the Netherlands became [one of the first non-G7 countries to sign a long-term security cooperation agreement](#) with Ukraine.²⁰⁴

North Macedonia

At the beginning of March 2022, the North Macedonian Government announced that it would donate military materiel and equipment to Ukraine.²⁰⁵ That equipment has included Soviet-era T-72 tanks, non-airworthy Su-25 aircraft (presumably for spare parts or refurbishment) and 12 Mi-24 attack helicopters.²⁰⁶

In December 2023 the government reportedly refused further Ukrainian requests for military donations, saying that the equipment was required for its own armed forces. It did confirm, however, its willingness to extend its training programme for Ukrainian soldiers, that had, until November 2023, remained confidential.²⁰⁷

In October 2024, the Ukrainian Government said the level of North Macedonian military assistance, per capita, placed it in the top four contributors among NATO countries.²⁰⁸

North Macedonia has also signed the G7 Joint Declaration setting out long term security guarantees to Ukraine.²⁰⁹

Norway

Norway has had a longstanding principle of not supplying weapons and ammunition to conflict zones.²¹⁰ In February 2022, Prime Minister Jonas Gahr Støre announced a change of policy which would allow Norway to send both defensive and offensive weapons to Ukraine.²¹¹ Capabilities have included anti tanks weapons, [NASAMS air defence systems](#), self-propelled artillery and associated munitions, multiple launch rocket systems, ammunition, armoured

vehicles, Leopard 2 tanks and F-16 aircraft.²¹² Norway has also been working closely with allies to either provide, or co-finance the production of, artillery, air defence systems, long-range multiple rocket launch systems and drones.²¹³ Norway provides funding to the International Fund for Ukraine and is also contributing to the Czech ammunition initiative and the German air defence initiative.²¹⁴

Norway has joined [the F-16 coalition](#) and is leading, alongside the UK, the maritime capability coalition.²¹⁵ Norway also contributes personnel to the UK-led basic training programme for Ukrainian personnel and the EU training mission.

Military aid to Ukraine is funded through [the Nansen Programme](#), which covers both civilian and military assistance. The programme has a total budget of NOK 205 billion (€17.3 billion) between 2023 and 2030.²¹⁶ The distribution of military and civilian funding varies each year and is determined by Ukraine's needs.²¹⁷ For 2025, the Norwegian parliament initially allocated NOK35 billion, of which NOK22.5 billion (€1.9 billion) was for military aid.²¹⁸ In April 2025, that budget was increased by a further NOK50 billion (€4.2 billion), which will be allocated entirely to military assistance.²¹⁹ Total military aid in 2025 is now NOK72.5 billion (€6.1 billion).

That additional funding will be channelled through international initiatives, such as the International Fund for Ukraine, and be used to support procurement from the Ukrainian defence industry. Priority will be given to air defence systems, artillery ammunition, drones and maritime capabilities.²²⁰

An agreement between Ukraine and Norway on long-term security assurances was concluded on 31 May 2024.²²¹

Poland

Poland has been supplying defensive lethal weaponry to Ukraine since the end of January 2022.

Poland has been the main supplier of heavy weaponry to Ukraine, including tanks, infantry fighting vehicles, artillery and ammunition.²²² It has also established a Leopard 2 tank maintenance centre in Poland to support the sustainment of Leopard 2 tanks in theatre in Ukraine. Poland has also supplied air defence missiles and was the first NATO country to provide combat aircraft (MiG-29 fighter jets).²²³ Poland has also joined the F-16 capability coalition.

Under the government of Prime Minister Donald Tusk, the focus of assistance has shifted toward the provision of loans for arms purchases and the joint production of weapons.²²⁴

Poland has also been acting as a logistical hub for the transfer of military equipment from other allies into the western part of Ukraine not occupied by Russian forces.²²⁵

As of June 2025, Polish military assistance to Ukraine has been valued at €3.5 billion.²²⁶

Poland and Ukraine signed a long-term bilateral security cooperation agreement on 8 July 2024.²²⁷

Portugal

Portugal has been providing lethal and non-lethal military aid since the early phases of the conflict. Assistance includes armoured vehicles, drones, artillery, helicopters and main battle tanks.²²⁸

Portugal has joined the F-16 training coalition and the maritime coalition being led by the UK and Norway.²²⁹ It has also joined the Czech initiative to urgently supply artillery ammunition and committed funding to the International Fund for Ukraine and the NATO comprehensive assistance package trust fund.²³⁰

Portugal takes part in the EU's training mission and has also offered to train Ukrainian personnel in demining and unexploded ordnance disposal.²³¹

Portugal and Ukraine agreed a bilateral security cooperation agreement on 28 May 2024.²³²

Portugal has committed more than €220 million in military support over the course of 2024. The same has been earmarked for 2025.²³³ The total value of military assistance is unclear.

Romania

In April 2022, amendments were made to the country's statute book to allow arms to be supplied not just to NATO allies, but also to partner countries.²³⁴

While military assistance has been ongoing, details are scarce, including on the value of aid. With the assistance of allies, Romania has contributed a Patriot air defence system and has been hosting military training.²³⁵ It has

offered its military bases to instructors from allied countries and in November 2023 opened an F-16 European training hub at an airbase in the south-east of the country.²³⁶

Romania is also acting as a transit country for military equipment and supplies from allies.

Romania concluded a bilateral agreement on security cooperation with Ukraine in July 2024.²³⁷

Romania's new President, Nicusor Dan, has pledged to continue providing military support to Ukraine.²³⁸

Slovakia

Slovakia has been a significant supplier of military equipment to Ukraine, having provided €671 million in military aid between February 2022 and October 2023.²³⁹ Equipment has included artillery, ammunition, anti-tank missiles, Soviet-era infantry fighting vehicles, air defence systems, and its fleet of Soviet-era MiG-29 combat aircraft.²⁴⁰ Slovakia has also been operating a repair hub for damaged Ukrainian military vehicles.

Following the election of Prime Minister Robert Fico in September 2023, bilateral military assistance to Ukraine ended.²⁴¹ The government has, however, maintained the repair hub and said that it would not prevent arms deliveries direct from the Slovakian defence industry.²⁴²

In April 2024 the government also said that it would not join the Czech-led initiative on the procurement of ammunition. In response, a crowdfunding campaign was established to which the Slovakian public had donated over €1 million in less than 48 hours.²⁴³

²³⁶ In November 2022, Romania bought 32 F-16 aircraft from Norway and will use the hub to train both domestic pilots and those of the Ukrainian air force (Reuters, "[Romania opens F-16 pilot training hub for NATO allies, Ukraine](#)", 13 November 2023 and Radio Free Europe, "[Romania inaugurates F-16 pilot training hub for NATO allies and Ukraine](#)", 14 November 2023)

²⁴³ BBC News, "[After their PM halts Ukraine aid, Slovaks dig deep to help](#)", 19 April 2024

Slovenia

Slovenia has provided both lethal and non-lethal military assistance to Ukraine since the end of February 2022. While details remain largely classified, that equipment is reported to have included drones, ammunition, large numbers of Soviet-era tanks and infantry fighting vehicles.²⁴⁴

Increasingly there has been a shift in focus toward the provision of humanitarian aid, and in particular de-mining assistance.²⁴⁵ In March 2024, the Slovenian Ministry of Defence confirmed that it donated €1 million to the Czech ammunition initiative.²⁴⁶ Slovenia also participates in the EU training mission for Ukraine.

Slovenia and Ukraine concluded a bilateral security cooperation agreement in July 2024.²⁴⁷

Spain

On 28 February 2022, the Spanish Government said that Spain would be prepared to send defensive military equipment to Ukraine, but ruled out sending offensive weapons, in part due to opposition from within the ruling coalition. However, after criticism from opposition parties the government changed course, confirming on 2 March 2022 that Spain would send offensive weapons.²⁴⁸

Military assistance has included Hawk air defence systems (and requisite training), Patriot air defence missiles (as opposed to a Patriot system), Mistral and Aspide surface to air missiles, armoured vehicles, artillery munitions and Leopard 2 tanks.²⁴⁹

The value of Spanish military assistance in 2024 was €1 billion. A further €1 billion has been committed for 2025.²⁵⁰

Sweden

Sweden has had a longstanding policy of military non-alignment. In February 2022, however, the Prime Minister announced that Sweden would provide direct support to Ukraine's armed forces.²⁵² Russia's invasion of Ukraine also prompted Sweden, in conjunction with Finland, to [apply for membership of NATO](#). Sweden became the 32nd member of NATO in March 2024.

Military assistance to Ukraine has included, among other things, anti-tank and anti-ship weapons, ammunition, parts for advanced air defence systems (Hawk and Iris-T), infantry fighting vehicles, the Archer artillery system, Leopard 2 tanks, air-to-air missiles that have been re-purposed for ground-based air defence and an airborne surveillance and control aircraft.²⁵³

Sweden has also been co-financing international initiatives aimed at rapidly procuring equipment, including the Czech ammunition project and the International Fund for Ukraine.²⁵⁴

In September 2024, the government confirmed that a new phase in military support would begin, with the focus of assistance on production and procurement, instead of donation.²⁵⁵

Sweden also participates in Operation Interflex, the EU training mission for Ukraine, and supports demining training in Lithuania.²⁵⁶ It has also joined eight of the capability coalitions, with the exception of ground-based air defence.²⁵⁷

Swedish military assistance, to date, totals SEK80 billion (approximately €7.4 billion).²⁵⁸ In May 2024, the Swedish Government announced a three-year framework for military support to Ukraine totalling SEK75 billion for 2024-2026 (€6.6 billion), or SEK 25 billion (€2.2 billion) per year.²⁵⁹

Turkey

Until the Russian invasion of Ukraine in February 2022 Turkey was the only country other than the US to provide Ukraine with lethal arms in the form of armed Bayraktar drones.²⁶¹

Turkey has continued with the provision of Bayraktar drones, although the government has referred to the drone shipments as “private sales” rather than military aid as it seeks to maintain a balancing act between Russia and the West.²⁶²

In June 2023 the Turkish Government was reported to have approved the necessary licensing permits for the Turkish company Baykar, which produces Bayraktar drones, to build a drone production plant in Ukraine. The plant is predicted to be operational in 2025.²⁶³

Turkey is also reported to have provided 50 mine-resistant armoured vehicles, with further deliveries expected.²⁶⁴

Other allies and partners

The remaining EU member states (Austria, Cyprus, Ireland and Malta), many of which are neutral countries, do not send lethal military equipment to Ukraine. They are, however, providing non-lethal assistance through the European Peace Facility. [Cyprus](#), [Ireland](#) and [Malta](#) also participate in the EU training mission for Ukraine.

Australia

Australia has provided over AUD \$1.3 billion (approximately US\$838 million) in military assistance to Ukraine since February 2022.²⁶⁵

That assistance includes armoured vehicles, M1A1 Abrams tanks, de-mining equipment, rigid hull boats and coastal defence, unmanned aerial systems, air defence capabilities, drones, precision munitions, artillery and ammunition.²⁶⁶

An Australian E7-A Wedgetail early warning aircraft also deployed to Germany in October 2023, along with up to 100 crew and support personnel, to help secure the route for humanitarian and military assistance into Ukraine.²⁶⁷

Australia has also made financial contributions to the International Fund for Ukraine and NATO's Comprehensive Assistance Package Trust Fund.²⁶⁸

Australian Defence Force personnel participate in the UK training programme (Operation Interflex) and personnel are embedded with NATO's Security Assistance and Training for Ukraine command.²⁶⁹

Australia is also a member of the drone capability coalition that is being led by the UK and Latvia.²⁷⁰

New Zealand

New Zealand has both donated, and provided financing for the purchase of, non-lethal military equipment for Ukraine. It also provides financing to the International Fund for Ukraine.²⁷¹ As of April 2025, the value of military assistance to Ukraine is \$152 million.²⁷²

Intelligence, logistics and liaison personnel have also deployed to the UK, Germany and Belgium to assist in the coordination of support and 100 military personnel from the New Zealand Defence Force are deployed as part of Operation Interflex. Those deployments have been extended to December 2026.²⁷³

Japan

Japan has been providing Ukraine with non-lethal military aid since March 2022.²⁷⁴

It does not provide lethal aid, but in December 2023 did amend its export control rules to allow the export of military equipment produced under foreign licence, to the countries of origin.²⁷⁵ That decision enabled Japan to provide Patriot air defence missiles to the United States to replenish its own stocks. While those missiles cannot be transferred to a third country without Japan's permission, the decision was regarded as inadvertent support for Ukraine as it allowed the US more freedom to send US-manufactured air defence systems to the country.²⁷⁶

Japan has extended its support to the demining and IT capability coalitions and has provided financing to the NATO Comprehensive Assistance Package Trust Fund.²⁷⁷

As a member of the G7, Japan has committed to provide Ukraine with [long term security guarantees \(PDF\)](#) and in line with its pacifist constitution, Japan concluded an [Accord on Support for Ukraine](#) (PDF) in June 2024. It is the first security agreement concluded with a non-NATO member state and a country in the Asia-Pacific.²⁷⁸
